

EXHIBIT 19

KRYFS has setup a fabrication units at Kherdi and Bhopal. These facilities are experts in creating transformer tanks with capacities ranging from 5 MVA to 500 MVA (up to 765 kV class). KRYFS is supplier to all major utilities in India and approved by POWERGRID, NTPC. In addition to transformer tanks the KRYFS fabrication units also manufacture shunt laminations and components and parts to Indian Railways.

Always Putting Values Above Business

- Transformer Tanks & Frames, 100 kVA to 315 MVA (up to 400 kV class)
- Waterjet Cutting Machine Job Work
- Heat Exchangers / Multipass Heat Exchangers
- Boilers & Turbine Generators
- Distillation Columns / Reactors
- Air Drying Plants Columns
- Filtration & Drying Equipments
- Pressure Vessels
- Storage Tanks
- Venturies and Scrubbers
- Air Receivers / Coolers

- Repairs & Maintenance of Heat Exchangers
- General Fabrication for all type of structures
- Welding of all types of exotic metals
- Air Pollution Control Systems
- Water and Waste Water Treatment and Recycling System
- Special Purpose Machines and CNC Gantry Type Machines
- Precision & Critical Machining
- In-situ Machining Services
- Special Tools & Cutters designing
- Jigs & Fixtures designing
- Conventional Machine Retrofitting
- Reverse Engineering & Prototyping
