Market Outlook

Summary

DRAM Demand B/G

Yr. '22; +Low Teen% YoY

NAND Demand B/G

Yr. '22; Around +20% YoY

Server

- 1H; Set build affected by component shortages, but healthy demand overall.
- 2H; Customers are likely to digest inventory due to economic slowdown.
- On-premise IT spending cuts by corporates may lead to higher use of cloud service, thus increasing Opex instead of Capex, potentially accelerating growth of cloud business and DC demand in the mid-long term.

PC & Mobile

- Consumer app. are most directly affected by inflation/reduced purchasing power. Significant downward revision in unit demand is expected.
- PC; Y/Y decline in PC shipment, but memory contents growth from higher share of high-end PCs(e.g. Gaming) will offset the decline.
- MO; Y/Y decline in smartphone shipment, esp. due to weak demand for low/mid-end segment, but flagship demand expected to be solid with new product launches in 2H.

Company Plan

DRAM

Achieved 100% 'RMAP certification' for 4 conflict minerals(3TG)* in supply chain

- As a member of RMI(Responsible Mineral Initiative), we assessed suppliers of raw materials containing 3TG in line with OECD due diligence guidance, and took improvement measures where necessary to achieve 100% 'RMAP(Responsible Minerals Assurance Process) certification'
- Disclosed the list of 3TG smelters in supply chain(227 in total) on our website, and plan to expand monitoring range to include not only conflict minerals, but also responsible minerals
