

Exhibit CC-95

Memory modules for extensive use

Proven DRAM module solution in the global market

Samsung's memory modules are designed for a wide range of applications to deliver the best performance with low power requirements.

RDIMM

Registered DIMM

Include a register for enhancing the clock, command and control signals
Error correction is available by adding 8-bit parity signals
Supports x4 / x8 Organization / up to 2 ranks per DIMM and 3DPC configuration
Application : Server

[Learn more](#)

LRDIMM

Load reduced DIMM

Include a register for enhancing clock, command, and control signals
Enhanced data signal by placing data buffer
The best solution for achieving high density with high speed
Supports x4 Organizations / up to 4 ranks per DIMM and 3DPC
Application : Server

[Learn more](#)

UDIMM

Unbuffered DIMM

No buffer or register : smaller latency value
Supports x8 / x16 Organization / up to 2 ranks per DIMM and 2DPC configuration
Application : Desktop

[Learn more](#)

SODIMM

Small outline DIMM

Smaller than normal DIMMs
Supports x8 / x16 / up to 2 ranks per DIMM and 2DPC configuration
For systems with limited space issues
Application : Laptop

[Learn more](#)

ECC UDIMM / ECC SODIMM

Error correction code UDIMM / SODIMM

Single error correction and detection are available
Supports x8 up to 2 ranks per DIMM
Application : High-end desktop, High-end laptop, Server

[Learn more](#)

LPCAMM2

Low Power Compression Module

A next-generation module based on LPDDR, with its smaller mounting area and dual-channel structure, improves the limitations of the existing module.
Application : Desktop, Laptop
