Zetwerk Acquires Majority Stake in KRYFS Power Components to Boost Manufacturing

14 Aug 2025 [International News](#)

Mumbai-based contract manufacturing startup Zetwerk has acquired a majority stake in KRYFS Power Components Ltd, a leading electrical equipment manufacturer specializing in transformer components and solar projects. The acquisition aims to integrate KRYFS's 10 manufacturing plants across India into Zetwerk's expanding manufacturing ecosystem.

Founded in 1992, **KRYFS** provides CRGO laminations, transformer cores and tanks, turnkey solutions, and solar project services. The company's CEO and Managing Director, **Saif Qureishi**, confirmed that KRYFS's leadership team will continue managing day-to-day operations.

 Transformer procurement services

Amrit Acharya, cofounder and CEO of **Zetwerk**, emphasized the strategic fit of KRYFS's domain expertise and quality standards with Zetwerk's vision to transform infrastructure manufacturing in India. Zetwerk, established in 2018, operates as a managed marketplace for contract manufacturing, connecting over 2,000 customers with more than 10,000 suppliers globally.

Zetwerk recently reported a 26% revenue increase to Rs 14,436 crore in FY24, despite a widened net loss of Rs 919 crore. The company has raised close to \$700 million since inception, including \$90 million in fresh funding this year led by investors such as Khosla Ventures and Baillie Gifford.

With the domestic transformer market projected to double to \$4.2 billion by 2030, the acquisition positions Zetwerk to expand capacity and deliver enhanced manufacturing solutions.
