DDR5 Products

Description

Leveraging its deep expertise in the memory industry, Montage Technology offers a comprehensive suite of DDR5 memory interface products, including:

- Multiplexed Rank Registering Clock Driver (MRCD)
- Multiplexed Rank Data Buffer (MDB)
- Registering Clock Driver (RCD)
- Data Buffer (DB)
- SPD EEPROM with Hub (SPD Hub)
- Temperature Sensor (TS)
- Power Management IC (PMIC)

These critical components are designed for various DDR5 memory modules, such as MRDIMM / MCRDIMM, RDIMM, LRDIMM, UDIMM, and SODIMM. They deliver high-performance, high-capacity memory solutions for next-generation servers, desktop computers, and laptops.

MRCD and MDB: Core Logic for High-Bandwidth Server Memory

The MRCD and MDB chips serve as core logic devices for high-bandwidth server memory modules - MRDIMM / MCRDIMM. This chipset employs double data rates and time-division data multiplexing technology, enabling simultaneous access to two memory ranks at standard rates, thereby achieving double the bandwidth.

The first-generation MRCD and MDB products support data rates of up to 8800MT/s, meeting the high memory bandwidth demands of data-intensive workloads.

Note: This image uses DDR5 MRDIMM / MCRDIMM as an example to showcase the application of our DDR5 memory interface chips.

Product List

Part No.	Product Type	Max Data Rate	Application
M88MR5RCD01 <i>New!</i>	Gen1 DDR5 MRCD	8800 Mbps	DDR5 MRDIMM / MCRDIMM
M88MR5DB01 <i>New!</i>	Gen1 DDR5 MDB	8800 Mbps	DDR5 MRDIMM / MCRDIMM
M88DR5RCD04	Gen4 DDR5 RCD	7200 Mbps	DDR5 RDIMM
M88DR5RCD03	Gen3 DDR5 RCD	6400 Mbps	DDR5 RDIMM
M88DR5RCD02	Gen2 DDR5 RCD	5600 Mbps	DDR5 RDIMM
M88DR5RCD01	Gen1 DDR5 RCD	4800 Mbps	DDR5 RDIMM and LRDIMM

Part No.	Product Type	Max Data Rate	Application
M88DR5DB01	Gen1 DDR5 DB	4800 Mbps	DDR5 LRDIMM
M88P5010 / M88P5000	DDR5 PMIC	/	DDR5 RDIMM and LRDIMM
M88SPD5118	DDR5 SPD Hub	/	DDR5 MRDIMM / MCRDIMM, RDIMM, LRDIMM, UDIMM, SODIMM, CUDIMM, CSODIMM, CMM and LPCMM
M88TS5110	DDR5 TS	/	DDR5 MRDIMM / MCRDIMM, RDIMM and LRDIMM
