MPQ8894

12V, 4A, Quad-Buck PMIC with I²C/I³C Interface for DDR5

Pre-Release

Description

The MPQ8894 is a complete power management IC (PMIC) that integrates four high-efficiency, step-down DC/DC converters and a flexible logic interface for DDR5.

The MPQ8894 provides four channel buck outputs. Buck A and buck B are configured to a dual-phase, interleaving buck converter with current-sharing performance. Buck C and buck D are configured to two single-phase buck converters that are designed to support the specific power requirements of DDR5.

[Show more](#)

Features & Benefits

- ✓ Wide 4.25V to 15V Input Voltage (VIN) Range
- ✓ JEDEC PMIC50x0 Power Management IC (PMIC) Specification Rev. 1.8 Compliant
- ✓ Adaptive Constant-On-Time (COT) for Ultra-Fast Transient Response
- ✓ Four High-Efficiency Step-Down Regulators:
 - Buck A: 4A DC/DC Converter
- ✓ Two Low-Dropout (LDO) Regulators:
 - VOUT_1V: 0.9V to 1.2V in 0.1V Steps
 - VOUT_1.8V: 1.7V to 1.9V in 0.1V Steps
- ✓ Fully Compliant with I²C and I³C Specifications
- ✓ Accurate VOUT, Output Current (IOUT), Output Power (POUT), and Junction Temperature (TJ) Monitoring
