VIA EDIS

The Honorable Brett W. Doyle
Chair
U.S. International Trade Commission
500 E Street, SW
Washington, DC 20436

**Re: *Certain Dynamic Random Access Memory (DRAM) Devices, Products
Containing the Same, and Components Thereof (III)*, Inv. No. 337-TA-
3930**

Dear Chair Doyle:

In connection with the above-referenced investigation, non-party *amicus curiae* Alliance of U.S. Startups and Inventors for Jobs (“USIJ”) respectfully requests leave to file its August 28, 2026 Public Interest Comments out of time, only three (3) business days after the August 25, 2026 deadline for public interest comments.

USIJ, as a coalition of startup companies, inventors, entrepreneurs, and investors whose businesses depend upon stable and reliable patent protection, has a strong interest in weighing in and having its voice heard on this issue. USIJ’s fundamental mission is to assist and inform members of Congress, the Federal Judiciary and leaders in the Executive branch regarding the critical role that patents play in our nation’s economic system. Thus, good cause exists to grant this request, given USIJ’s strong interest in having its statement considered and the need for the Commission to hear from other entities situated similarly to the complainant here.

By the instant letter, USIJ respectfully requests that the Commission accept USIJ’s Public Interest Statement three business days out of time.

Please contact me with any questions regarding this submission. Thank you for your attention to this matter.

Respectfully submitted,

Amicus Curiae Alliance of U.S. Startups and Inventors for
Jobs (“USIJ”)

By:
Robert Taylor
General Counsel
USIJ
