**BRIEF OF THE OFFICE OF UNFAIR IMPORT INVESTIGATIONS
ON REMEDY, THE PUBLIC INTEREST, AND BONDING**

I. INTRODUCTION

The Office of Unfair Import Investigations (“OUII”) respectfully submits this brief pursuant to the Notice of Request for Written Submissions on Remedy, the Public Interest, and Bonding with Respect to the Respondent Found in Default, issued August 23, 2006 (“Notice”). For the reasons set forth below, OUII is of the view that the appropriate remedy in this investigation is a limited exclusion order directed at the products of Respondent that infringe the asserted design patent, copyright, and trademark.¹ OUII also recommends that any exclusion order issued here include a reporting requirement for Complainant with respect to the trademark in question. OUII believes that a cease and desist order

¹ OUII’s proposed exclusion order is attached. (*See* Attachment A). OUII has also provided a copy of its proposed order to the Intellectual Property Rights Branch of U.S. Customs and Border Protection (“Customs”), but Customs has not yet provided any comments. OUII will indicate in its reply brief if Customs raises any objections to its proposed exclusion order.

should not be issued. Finally, OUII is of the view that the appropriate bond during the Presidential review period is 100% of entered value.

II. BACKGROUND

In its Complaint, filed on February 8, 2006, Complainant Roadmaster (USA) Corp. (“Roadmaster”) alleges that Respondent Sinochem Ningbo, Ltd. (“Sinochem”) has violated Section 337 in the importation into the United States, sale for importation, and sale after importation of certain portable power stations and packaging therefor by reason of: (1) infringement of U.S. Design Patent No. D469,739; (2) infringement of U.S. Trademark Registration No. 2,594,538; and (3) infringement of U.S. Copyright Registration No. VA-1-261-495. A supplement to the Complaint was filed on February 27, 2006. On March 7, 2006, the Commission voted to institute an investigation based on the Complaint, as supplemented, and the Notice of Investigation was published in the Federal Register on March 14, 2006. *See 71 Fed. Reg.* 13166 (March 14, 2006).

Respondent Sinochem did not file a response to the Complaint and Notice of Investigation, and did not otherwise appear in the investigation. On May 9, 2006, Complainant moved for an order to show cause why Sinochem should not be found in default. On May 24, 2006, the Judge granted Complainant’s motion, and directed Sinochem to show cause why it should not be found in default by no later than June 13, 2006. (Order No. 4). Sinochem did not make any

submissions, and on July 12, 2006, the Judge found Sinochem to be in default. (Order No. 5). On July 20, 2006, the Commission determined not to review the Judge's decision to hold Sinochem in default. On August 9, 2006, Complainant filed a declaration pursuant to Commission Rule 210.16(c)(1) seeking entry of relief against Sinochem ("Complainant's Declaration"). The Commission has now requested briefing on issues of remedy, the public interest, and bonding. (*See* Notice at 3).

III. REMEDY

Section 337(g)(1) states that when a respondent defaults, "the Commission shall presume the facts alleged in the complaint to be true and shall, upon request, issue an exclusion from entry or a cease and desist order, or both, limited to that person" except when the public interest weighs against the entry of relief. 19 U.S.C. § 1337(g)(1). However, the Commission has "broad discretion in selecting the form, scope and extent of the remedy." *Viscofan, S.A. v. United States Int'l Trade Comm'n*, 787 F.2d 544, 548 (Fed. Cir. 1986). OUII is of the view that the appropriate remedy in this investigation is a limited exclusion order that includes a reporting requirement for Complainant with respect to the trademark at issue. OUII does not believe that a cease and desist order is appropriate.

A. Exclusion Order

**1. A Limited Exclusion Order
Should Be Issued**

In general, the Commission may issue either a limited or a general exclusion order if a violation of Section 337 is found. *See* 19 U.S.C. § 1337(d). However, the Respondent in this investigation has defaulted, and thus, because Complainant has requested relief limited to Respondent Sinochem (*see* Complainant's Declaration at 1), the allegations of the Complaint are presumed to be true, and the Commission "shall issue an exclusion from entry or a cease and desist order, or both, *limited to that person.*" 19 U.S.C. § 1337(g)(1). The appropriate remedy in this investigation is therefore a limited exclusion order directed at the products of Respondent Sinochem that infringe Complainant's design patent, registered copyright, or registered trademark.

**2. The Exclusion Order Should Contain a
Reporting Requirement for Complainant
With Respect to Its Trademark**

OUII also believes that in conformance with current Commission practice, any exclusion order directed at products that infringe Complainant's registered trademark should contain a reporting requirement for Complainant.² Specifically, Complainant should be required to periodically certify to the Commission that it

² This reporting requirement would not apply to Complainant's copyright and design patent.

continues to use the trademark at issue and that this mark has not been abandoned, canceled, or been held invalid or unenforceable. *See, e.g., Certain Ink Markers and Packaging Thereof*, Inv. No. 337-TA-522, General Exclusion Order ¶ 6 (Oct. 25, 2005); *Certain Purple Protective Gloves*, Inv. No. 337-TA-500, General Exclusion Order ¶ 4 (Dec. 22, 2004). Because trademarks (unlike patents or copyrights) do not expire after a set period, exclusion orders based on trademarks can impose special burdens on Customs by requiring Customs to enforce exclusion orders of unlimited duration. *See generally Certain Agricultural Vehicles and Components Thereof*, Inv. No. 337-TA-487, Commission Opinion at 11-12, USITC Pub. 3735 (Dec. 2004), *rev'd on other grounds sub nom. Bourdeau Bros., Inc. v. International Trade Comm'n*, 444 F.3d 1317 (Fed. Cir. 2006). OUII's proposed exclusion order therefore contains a provision requiring Complainant to file yearly statements with the Commission, under oath, as to the status of its trademark rights.³ (*See* Attachment A, ¶ 4).

B. Cease and Desist Order

In addition to, or instead of, an exclusion order, the Commission may issue a cease and desist order directed to a defaulting respondent. *See* 19 U.S.C. § 1337(g)(1). However, the Commission will generally issue cease and desist

³ In the event that Complainant's reports reveal that Complainant no longer possesses rights in the marks at issue or that there is otherwise no basis for continued enforcement of the order, the Commission may then consider modification or rescission of the exclusion order. *See* 19 C.F.R. § 210.76.

orders ““only to entities with significant domestic operations or inventory.””

Certain Agricultural Tractors, Lawn Tractors, Riding Lawnmowers, and Components Thereof, Inv. No. 337-TA-486, Commission Opinion at 17, USITC Pub. 3625 (Aug. 2003), *quoting Certain Lens-Fitted Film Packages*, Inv. No. 337-TA-406, Commission Opinion at 15 (June 23, 2003). Moreover, it may be difficult, if not impossible, to enforce a cease and desist order against a foreign company that does not have substantial contacts with the United States. *See Certain Reclosable Plastic Bags and Tubing*, Inv. No. 337-TA-266, Notice of Issuance of Temporary Exclusion Order at 5 (Jan. 1988), USITC Pub. 2058 (Jan 1988) (“A TEO is a more appropriate and effective form of relief as to foreign manufacturers, considering the potential difficulty of enforcing a cease and desist order issued to a foreign entity.”).

Here, OUII understands that Complainant will not request a cease and desist order. Respondent Sinochem is based in China, and is not alleged to have any domestic facilities. (*See* Complaint, ¶¶ 10-14). Sinochem’s U.S. distributor was not named as a Respondent in this investigation and, in any event, has entered into a stipulated injunction with Roadmaster in U.S. District Court. (*See* Complaint, ¶ 67; Supplement to the Complaint, Ex. 2). Under these circumstances, OUII does not believe that a cease and desist order is appropriate.

IV. THE PUBLIC INTEREST

Section 337(g) of the Tariff Act of 1930, as amended, also directs the Commission to consider certain public interest factors before issuing a remedy. These public interest factors include the effect of any remedial order on the “public health and welfare, competitive conditions in the United States economy, the production of like or directly competitive articles in the United States, and United States consumers.” 19 U.S.C. § 1337(g); *see also Certain Ink Jet Print Cartridges and Components Thereof*, Inv. No. 337-TA-446, Commission Opinion at 14, USITC Pub. 3549 (Oct. 2002) (“*Ink Jet Cartridges*”) (discussing the public interest factors generally).

OUII submits that entry of a limited exclusion order as described above would not be contrary to the public interest. There is no evidence that U.S. demand for portable power stations cannot be met by other entities, including Complainant. Moreover, portable power stations are not the types of products that raise any particular public interest concerns. *See generally Ink Jet Cartridges*, Commission Opinion at 14 (noting that relief has been denied in only three investigations due to public interest factors, and that these investigations involved fuel-efficient automobiles, atomic research, and medical supplies). OUII is therefore unaware of any public interest considerations that would militate against entry of the proposed remedial order.

V. BONDING

If the Commission enters an exclusion order, Respondent may continue to import and sell products during the pendency of the Presidential review period,⁴ provided that it posts a bond. This bond must be in an amount determined by the Commission to be “sufficient to protect the complainant from any injury.” 19 U.S.C. § 1337(j)(3); 19 C.F.R. § 210.50(a)(3). OUII is of the view that under the circumstances of this investigation, a Presidential review period bond of 100% of entered value is appropriate.

“In setting the bond amount, the Commission typically has considered the differential in sales price between the patented product made by domestic industry and the lower price of the infringing imported product.” *Certain Microsphere Adhesives, Process for Making Same, and Products Containing Same, Including Self-Stick Repositionable Notes*, Inv. No. 337-TA-366, Commission Opinion at 24, USITC Pub. 2949 (Jan. 1996). Where the available pricing information is inadequate, however, the bond may be set at 100% of entered value. *See, e.g., Certain Neodymium-Iron-Boron Magnets, Magnet Alloys, and Articles Containing Same*, Inv. No. 337-TA-372, Commission

⁴ The President has delegated his authority to review Commission remedial orders to the United States Trade Representative. *See* 70 *Fed. Reg.* 43251 (July 26, 2005).

Opinion on Remedy, the Public Interest, and Bonding, at 15, USITC Pub. 2964 (May 1996).

Here, Respondent Sinochem has defaulted and has not presented any evidence as to its prices. It is thus impossible to calculate the bond based on pricing differentials. Under the circumstances, a bond of 100% of entered value is appropriate. *See, e.g., Certain Ink Sticks for Solid Ink Printers*, Inv. No. 337-TA-549, Limited Exclusion Order, ¶ 2 (April 11, 2006) (setting bond at 100% where respondent had defaulted); *Certain Ear Protection Devices*, Inv. No. 337-TA-518, Limited Exclusion Order, ¶ 2 (June 3, 2005) (setting bond at 100% where respondent had defaulted); *Certain Gun Barrels Used in Firearms Training Systems*, Inv. No. 337-TA-505, Limited Exclusion Order, ¶ 2 (Feb. 3, 2005) (setting bond at 100% where respondent had defaulted).

VI. CONCLUSION

For all of the above reasons, OUII believes that the Commission should enter a limited exclusion directed at the infringing products of Respondent Sinochem Ningbo, Ltd., and that this exclusion order should contain a provision requiring Complainant to report annually on the status of its trademark. OUII does not believe that a cease and desist order should be issued. Finally, OUII believes that the Presidential review period bond should be set at 100% of entered value.

Respectfully submitted,

Inv. No. 337-TA-563

**LIMITED EXCLUSION ORDER
[PROPOSED]**

The Commission instituted this investigation on March 14, 2006, based on a complaint filed by Roadmaster (USA) Corp. of Eatontown, New Jersey. 71 *Fed. Reg.* 13166 (March 14, 2006). The complaint, as supplemented, alleges violations of section 337 of the Tariff Act of 1930, as amended, in the importation into the United States, sale for importation, and sale within the United States after importation of certain portable power stations and packaging therefor by reason of: (1) infringement of U.S. Design Patent No. D469,739 (“the ‘739 patent”); (2) infringement of U.S. Trademark Registration No. 2,594,538 (“the ‘538 mark”); and (3) infringement of U.S. Copyright Registration No. VA-1-261-495 (“the ‘495 copyright”). The complaint further alleges the existence of a domestic industry. The Commission’s notice of investigation names Sinochem Ningbo, Ltd. (“Sinochem”), of Ningbo, China, as the respondent.

The presiding administrative law judge (“ALJ”) issued an initial determination on July 12, 2006, finding the respondent in default, because the respondent did not reply to the complaint or notice of investigation, and because the respondent did not reply to a show cause order issued by the ALJ on May 24, 2006. The Commission declined to review the ALJ’s determination that respondent Sinochem, the only respondent named in the investigation, defaulted. Roadmaster seeks relief limited to Sinochem. Since all of the requirements of 19 U.S.C. § 1337(g)(1) are satisfied, the Commission may presume that the facts alleged in the complaint are true and issue an exclusion from entry order and/or a cease and desist order.

Having reviewed the record in this investigation, including the written submissions of the parties, the Commission has made its determination on the issues of remedy, the public interest, and bonding. The Commission has determined that the appropriate form of relief is a limited exclusion order prohibiting the unlicensed entry of infringing portable power stations and packaging therefor that are covered by one or more of the ‘739 patent, the ‘538 mark, and the ‘495 copyright, and that are manufactured abroad by or on behalf of, or imported by or on behalf of, Sinochem. The Commission has also determined that the public interest factors enumerated in 19 U.S.C. § 1337(g)(1) do not preclude issuance of the limited exclusion order, and that the bond during the Presidential review period shall be in the amount of 100% of the entered value

of the portable power stations and packaging therefor that are subject to this Order.

Accordingly, the Commission hereby **ORDERS** that:

1. Portable power stations and packaging therefor that infringe one or more of the '739 patent, the '538 mark, and the '495 copyright,¹ that are manufactured abroad and/or imported by or on behalf of Sinochem, or any of its affiliated companies, parents, subsidiaries, or other related business entities, or their successors or assigns, shall be excluded from entry for consumption into the United States, entry for consumption from a foreign-trade zone, or withdrawal from a warehouse for consumption, for the remaining term of the patent and copyright, or until such date as the trademark is abandoned, canceled, or rendered invalid or unenforceable, except under license of the patent, copyright or trademark owner or as provided by law.

2. Products that are excluded by paragraph 1 of this Order are entitled to entry for consumption into the United States, entry for consumption from a foreign-trade zone, or withdrawal from a warehouse for consumption, under bond in the amount of 100% of the entered value pursuant to subsection (j) of section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. § 1337(j), from the day after this Order is received by the United States Trade Representative as delegated by

¹ Copies of the registered design patent, trademark, and copyright are attached hereto.

the President, 70 *Fed. Reg.* 43251 (July 21, 2005), and until such time as the United States Trade Representative notifies the Commission that this action is approved or disapproved but, in any event, not later than sixty (60) days after the date of receipt of this action.

3. In accordance with 19 U.S.C. § 1337(l), the provisions of this Order shall not apply to portable power stations and packaging therefor that are imported by and for the use of the United States, or imported for, and to be used for, the United States with the authorization or consent of the Government.

4. Complainant Roadmaster shall file a written statement with the Commission, made under oath, each year on the anniversary of the issuance of this Order stating whether they continue to use the aforesaid trademark in the United States in connection with portable power stations and packaging therefor and whether the aforesaid trademark has been abandoned, canceled, or rendered invalid or unenforceable.

5. The Commission may modify this Order in accordance with the procedures described in Rule 210.76 of the Commission's Rules of Practice and Procedure, 19 C.F.R. § 210.76.

6. The Secretary shall serve copies of this Order upon each party of record in this investigation and upon the Department of Health and Human Services, the Department of Justice, the Federal Trade Commission, and U.S. Customs and Border Protection.

7. Notice of this Order shall be published in the *Federal Register*.

By Order of the Commission.

Marilyn R. Abbott
Secretary
