

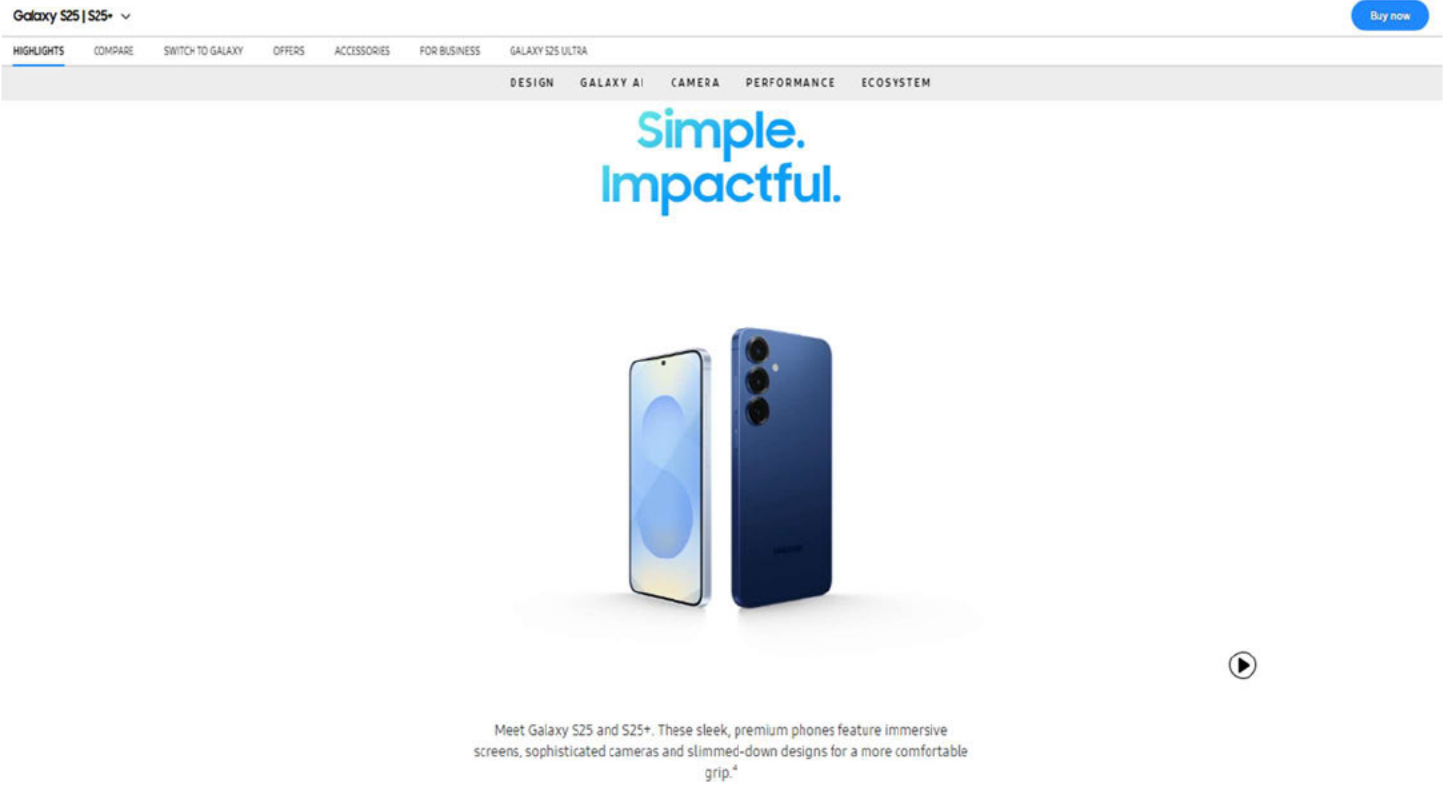

EXHIBIT 28

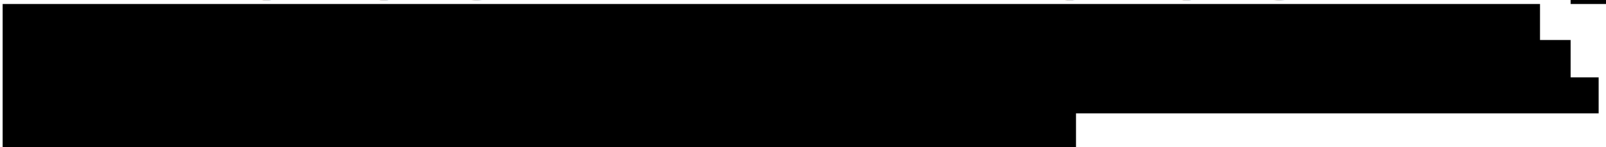

EXHIBIT 28C

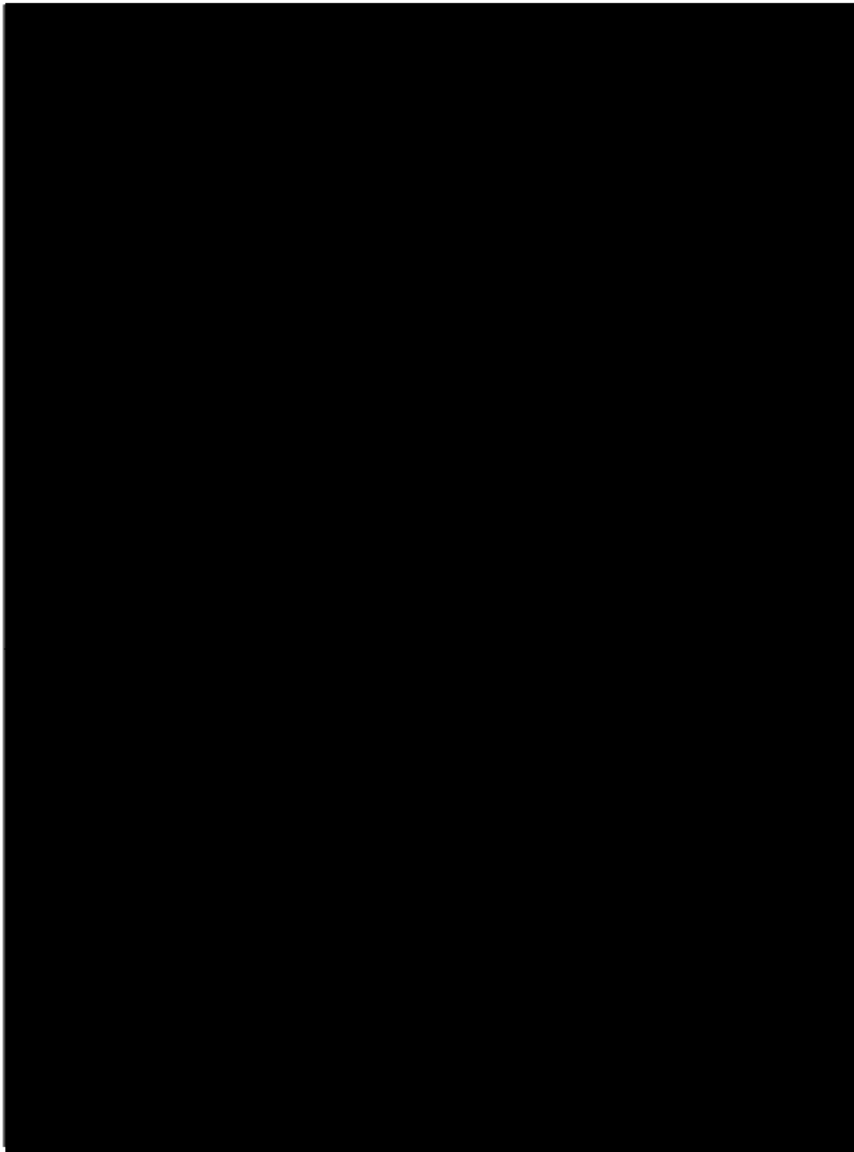

Samsung Galaxy S22, S22+, S22 Ultra, S23, S23+, S23 Ultra, S23 FE, S24, S24+, S24 Ultra, S24 FE, S25, S25+, S25 Ultra, S25 Edge, and S25 FE Domestic Industry Claim Chart - U.S. Patent No. 10,978,789

	U.S. Patent No. 10,978,789
Independent Claim 1	Samsung Galaxy S22, S22+, S22 Ultra, S23, S23+, S23 Ultra, S23 FE, S24, S24+, S24 Ultra, S24 FE, S25, S25+, S25 Ultra, S25 Edge, and S25 FE, and Corresponding Applications (collectively, "Domestic Industry Products")
1[pre] 1. A portable communication device comprising:	To the extent that the preamble is limiting, the Domestic Industry Products are portable communication devices.  (https://www.samsung.com/us/smartphones/galaxy-s25/)
1[a] a housing including a first	The Domestic Industry Products include a housing including a first conduction portion forming a first portion of a side surface of the portable communication device and a second conduction portion forming a second portion of the side surface,

conduction portion forming a first portion of a side surface of the portable communication device and a second conduction portion forming a second portion of the side surface, the first conduction portion operating as a first antenna and the second conduction portion operating as a second antenna;

the first conduction portion operating as a first antenna and the second conduction portion operating as a second antenna. 

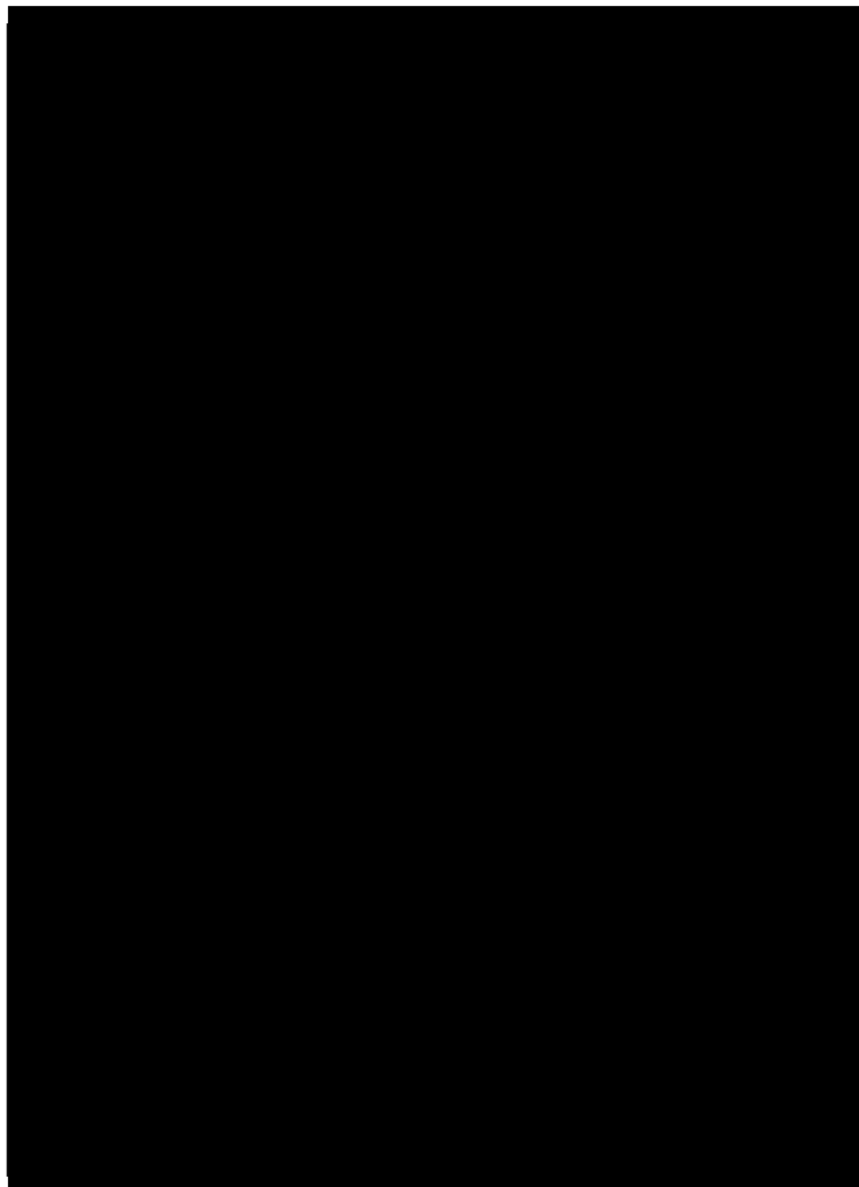

1[b] a wireless communication circuitry; and

The Domestic Industry Products include a wireless communication circuitry.

1[c] a first printed circuit board (PCB) including:

The Domestic Industry Products include a first printed circuit board (PCB). [REDACTED]

1[c][i] a first PCB
portion;

The Domestic Industry Products include a first PCB portion. [REDACTED]
[REDACTED]

1[c][ii] a second PCB portion in contact with the first PCB portion and being more flexible than the first PCB portion;

The Domestic Industry Products include a second PCB portion in contact with the first PCB portion and being more flexible than the first PCB portion.

1[c][iii] a third PCB portion in contact with the second PCB portion and being less flexible than the second PCB portion;

The Domestic Industry Products include a third PCB portion in contact with the second PCB portion and being less flexible than the second PCB portion. [REDACTED]

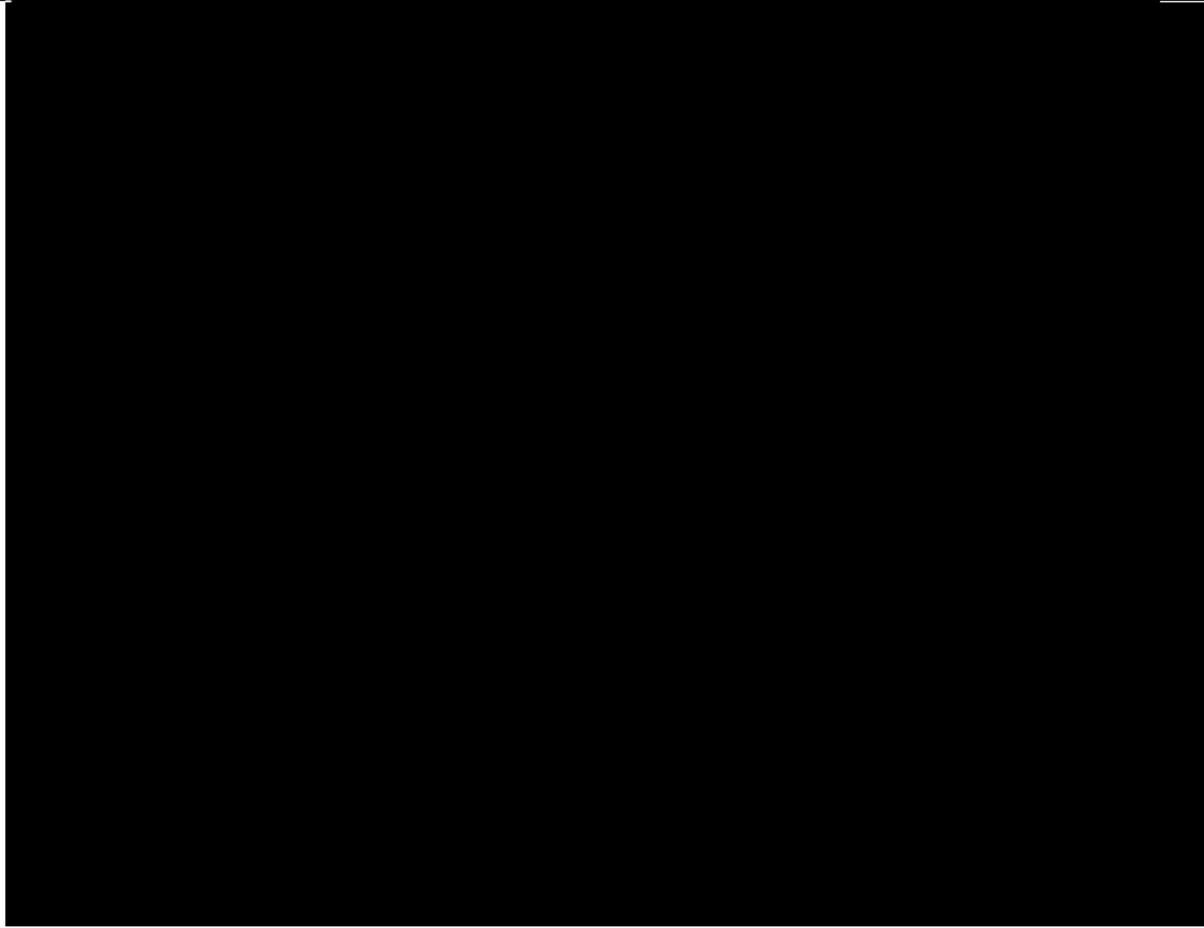

1[c][iv] a fourth PCB portion in contact with the third PCB portion and being more flexible than the third PCB portion; and

The Domestic Industry Products include a fourth PCB portion in contact with the third PCB portion and being more flexible than the third PCB portion. [REDACTED]

1[c][v] a plurality of lines located from the first PCB portion to the fourth PCB portion through the second PCB portion and the third PCB portion,

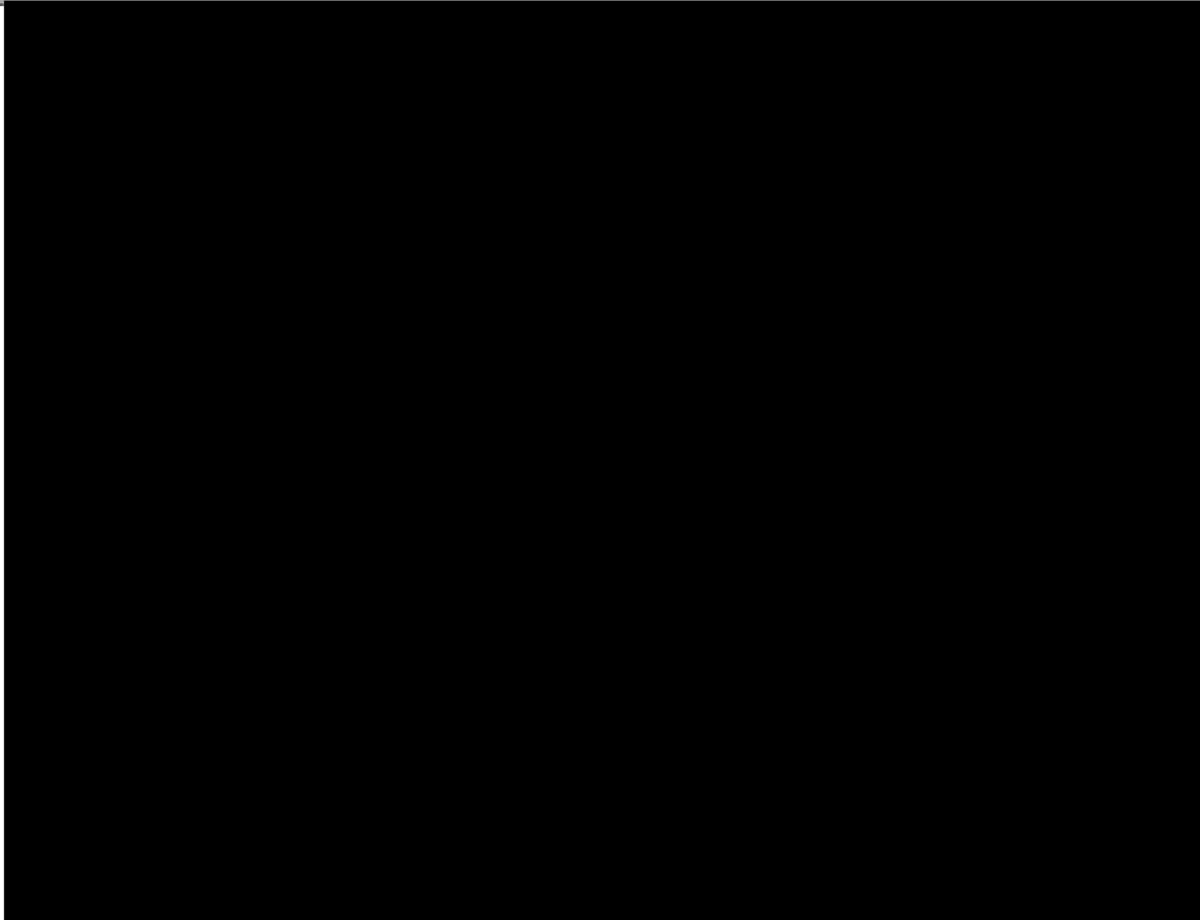

The Domestic Industry Products include a plurality of lines located from the first PCB portion to the fourth PCB portion through the second PCB portion and the third PCB portion.

1[c][vi] the plurality of lines including a first ground line, a second ground line at least partially spaced apart from the first ground line,

The Domestic Industry Products include a first ground line, a second ground line at least partially spaced apart from the first ground line. [REDACTED]

1[c][vii] a first signal line located between the first ground line and the second ground line, and a second signal line located between the first signal line and the second ground line, the first signal line electrically

The Domestic Industry Products include a first signal line located between the first ground line and the second ground line, and a second signal line located between the first signal line and the second ground line, the first signal line electrically connected with the first antenna and the wireless communication circuitry, and the second signal line electrically connected with the second antenna and the wireless communication circuitry.

connected with the first antenna and the wireless communication circuitry, and the second signal line electrically connected with the second antenna and the wireless communication circuitry.
