Merriam- Webster's Collegiate[®] Dictionary

ELEVENTH
EDITION

Merriam-Webster, Incorporated
Springfield, Massachusetts, U.S.A.

A GENUINE MERRIAM-WEBSTER

The name *Webster* alone is no guarantee of excellence. It is used by a number of publishers and may serve mainly to mislead an unwary buyer.

Merriam-Webster™ is the name you should look for when you consider the purchase of dictionaries or other fine reference books. It carries the reputation of a company that has been publishing since 1831 and is your assurance of quality and authority.

bin-oc-u-lar \bi-'nā-kyā-lār, bə-' \ *adj* (1738) : of, relating to, using, or adapted to the use of both eyes — **bin-oc-u-lar-i-ty** \bi-'nā-kyā-lər-ə-tē, -lā-rə, bə-' \ *n* — **bin-oc-u-lar-ly** \bi-'nā-kyā-lər-lē, bə-' \ *adv*
bin-oc-u-lar \bā-'nā-kyā-lār, bi-' \ *n* (1871) 1 : a binocular optical instrument 2 : a handheld optical instrument composed of two telescopes and a focusing device and usu. having prisms to increase magnifying ability — usu. used in pl.
bi-no-mi-al \bi-'nō-mē-əl \ *n* [NL *binomium*, fr. ML, neut. of *binomius* having two names, alter. of L *binominis*, fr. *bi-* + *nomin-*, *nomen* name — more at NAME] (1557) 1 : a mathematical expression consisting of two terms connected by a plus sign or minus sign 2 : a biological species name consisting of two terms — **binomial** *adj* — **bi-no-mi-al-ly** \bi-'nō-mē-əl \ *adv*
binomial coefficient *n* (1876) : a coefficient of a term in the expansion of the binomial $(x + y)^n$ according to the binomial theorem
binomial distribution *n* (1911) : a probability function each of whose values gives the probability that an outcome will occur a given number of times in a succession of repetitions of the experiment
binomial nomenclature *n* (1880) : a system of nomenclature in which each species of animal or plant receives a name of two terms of which the first identifies the genus to which it belongs and the second the species itself
binomial theorem *n* (1753) : a theorem that specifies the expansion of a binomial of the form $(x + y)^n$ as the sum of $n + 1$ terms of which the general term is of the form

$$\frac{n!}{(n-k)!k!} x^{n-k} y^k$$

where k takes on values from 0 to n

bi-nt \bi-'nē \ *n* [Ar. *girl, daughter*] (1855) *Brit* : GIRL, WOMAN
bi-nu-cle-ate \bi-'nū-klē-ət \ *also* -'nyū- \ *also* **bi-nu-cle-ate** \bi-'klē-ə-tād \ *adj* (1881) : having two cellular nuclei (~ hepatocytes)
bio \bi-' \ *n*, *pl* **bi-os** (1947) : a biography or biographical sketch
bio- — see **bi-**
bio-acous-tics \bi-'(jō-ə-'kū-stiks \ *n* *pl* but *sing* in *constr* (1957) : a branch of science concerned with the production of sound by and its effects on living organisms — **bio-ac-ous-ti-clan** \bi-'(jō-ə-'sti-shən, -'sā-'kū- \ *n*
bio-ac-tive \bi-'ō-'ak-tiv \ *adj* (1965) : having an effect on a living organism (~ molecules) — **bio-ac-tiv-i-ty** \bi-'ō-'ak-tiv-ē-tē \ *n*
bio-as-say \bi-'(jō-ə-'sā, -'sā \ *n* (1912) : determination of the relative strength of a substance (as a drug) by comparing its effect on a test organism with that of a standard preparation — **bio-as-say** \bi-'(jō-ə-'sā, -'sā \ *n*
bio-avail-abil-i-ty \bi-'vā-lā-'bi-lē-tē \ *n* (1971) : the degree and rate at which a substance (as a drug) is absorbed into a living system or is made available at the site of physiological activity — **bio-avail-able** \bi-'vā-lā-bəl \ *adj*
bio-be-hav-i-or-al \bi-'hā-vyā-rəl \ *adj* (1970) : of, relating to, or involving the interaction of behavior and biological processes
bio-cat-aly-st \bi-'kāt-ə-ləst \ *n* (ca. 1925) : a catalyst (as an enzyme) of biological origin — **bio-cat-aly-y-sis** \bi-'kāt-ə-lā-sis \ *n* — **bio-cat-a-lyt-ic** \bi-'kāt-ə-'li-tik \ *adj*
bio-ce-no-sis or **bio-coe-no-sis** \bi-'ō-sə-'nō-səs \ *n*, *pl* -**no-ses** \bi-'sēz \ [NL, fr. *bi-* + Gk *koinōsis* sharing, fr. *koinōn* to make common, fr. *koinos* common] (1883) : an ecological community esp. when forming a self-regulating unit
bio-cen-tric \bi-'sen-trik \ *adj* (ca. 1889) : considering all forms of life as having intrinsic value — **bio-cen-trism** \bi-'sen-triz-əm \ *n*
bio-chem-i-cal \bi-'ō-'ke-mi-kəl \ *adj* [ISV] (1851) 1 : of or relating to biochemistry 2 : characterized by, produced by, or involving chemical reactions in living organisms (~ defect in the brain) — **bio-chemical** *n* — **bio-chem-i-cal-ly** \bi-'ō-'ke-mi-kəl \ *adv*
biochemical oxygen demand *n* (ca. 1927) : the oxygen used in meeting the metabolic needs of aerobic microorganisms in water rich in organic matter (as water polluted with sewage)
bio-chem-is-try \bi-'ō-'ke-mə-strē \ *n* [ISV] (1848) 1 : chemistry that deals with the chemical compounds and processes occurring in organisms 2 : the chemical characteristics and reactions of a particular living organism or biological substance — **bio-chem-ist** \bi-'mīst \ *n*
bio-chip \bi-'ō-'chip \ *n* (1980) 1 : a hypothetical computer logic circuit or storage device in which the physical or chemical properties of large biological molecules (as proteins) are used to process information 2 : MICROARRAY
bio-cid-al \bi-'ō-'sī-dəl \ *adj* (1949) : destructive to life
bio-clde \bi-'ō-'sīd \ *n* (1947) : a substance (as DDT) that is destructive to many different organisms
bio-cl-mat-ic \bi-'ō-'klī-'ma-tik \ *adj* (1918) : of or relating to the relations of climate and living matter (~ adaptations)
bio-com-pat-i-bil-i-ty \bi-'kəm-pā-tə-'bi-lē-tē \ *n* (1971) : compatibility with living tissue or a living system by not being toxic, injurious, or physiologically reactive and not causing immunological rejection — **bio-com-pat-i-ble** \bi-'kəm-pā-tə-bəl \ *adj*
bio-con-tain-ment \bi-'kən-'tān-mənt \ *n* (1985) : the containment of extremely pathogenic organisms (as viruses) usu. by isolation in secure facilities to prevent their accidental release esp. during research
bio-con-trol \bi-'ō-'kən-'trōl \ *n* (1967) : BIOLOGICAL CONTROL
bio-con-ver-sion \bi-'(jō-'kən-'vər-zhən, -'shən \ *n* (1960) : the conversion of organic materials (as wastes) into an energy source (as methane) by processes (as fermentation) involving living organisms
bio-de-fense \bi-'(jō-'di-'fens \ *n*, *often attrib* (1987) : the means or methods of preventing, detecting, or managing an attack involving biological weapons
bio-de-grad-able \bi-'di-'grā-də-bəl \ *adj* (1961) : capable of being broken down esp. into innocuous products by the action of living things (as microorganisms) (~ trash bags) — **bio-de-grad-abil-i-ty** \bi-'di-'grā-də-'bi-lē-tē \ *n* — **biodegradable** *n* — **bio-de-grade** \bi-'di-'grād \ *v*
bio-de-te-ri-o-ra-tion \bi-'di-'tir-ē-ō-'rā-shən \ *n* (1953) : the breakdown of materials by microbial action
bio-die-sel \bi-'di-'zēl, -'səl \ *n* (1986) : a fuel that is similar to diesel fuel and is derived from usu. vegetable sources (as soybean oil)

bio-di-ver-si-ty \bi-'dī-vər-sə-tē, -dī- \ *n* (1985) : biological diversity in an environment as indicated by numbers of different species of plants and animals — **bio-di-verse** \bi-'dī-vərs, -də- \ *adj*
bio-dy-nam-ic \bi-'dī-'nā-mik, -dī- \ *adj* (1939) : of or relating to a system of farming that uses only organic materials for fertilizing and soil conditioning — **bio-dy-nam-ics** \bi-'dī-'nā-miks \ *n* *pl* but *sing* in *constr*
bio-elec-tric \bi-'i-'lek-trik \ *also* **bio-elec-tri-cal** \bi-'i-'tri-kəl \ *adj* (1914) : of or relating to electric phenomena in living organisms — **bio-elec-tri-cally** \bi-'i-'lek-'tri-kəl \ *adv*
bio-en-er-get-ics \bi-'e-nər-'je-tiks \ *n* *pl* but *sing* in *constr* (1912) 1 : the biology of energy transformations and energy exchanges (as in photosynthesis) within and between living things and their environments 2 : a system of physical and psychological therapy that is held to increase well-being by releasing blocked physical and psychic energy — **bio-en-er-get-ic** \bi-'e-tik \ *adj*
bio-en-gi-neer \bi-'en-'jā-nīr \ *n* (1951) : to modify or produce by bioengineering (~ed insulin) — **bioengineer** *n*
bio-en-gi-neer-ing \bi-'en-'jā-nīr-īŋ \ *n* (ca. 1954) 1 : biological or medical application of engineering principles or engineering equipment — called also *biomedical engineering* 2 : the application of biological techniques (as genetic recombination) to create modified versions of organisms (as crops); esp : GENETIC ENGINEERING
bio-equi-val-ence \bi-'kwiv-lən(t)s, -'kwī-və- \ *n* (1977) : the property wherein two drugs with identical active ingredients or two different dosage forms of the same drug possess similar bioavailability and produce the same effect at the site of physiological activity — **bio-equi-valent** \bi-'lən(t) \ *adj*
bio-eth-ics \bi-'e-thiks \ *n* *pl* but *sing* in *constr* (1971) : a discipline dealing with the ethical implications of biological research and applications esp. in medicine — **bio-eth-i-cal** \bi-'e-thi-kəl \ *adj* — **bio-eth-i-cist** \bi-'e-thə-sist \ *n*
bio-feed-back \bi-'fēd-'bak \ *n* (1970) : the technique of making unconscious or involuntary bodily processes (as heartbeats or brain waves) perceptible to the senses (as by the use of an oscilloscope) in order to manipulate them by conscious mental control
bio-film \bi-'film \ *n* (1981) : a thin usu. resistant layer of microorganisms (as bacteria) that form on and coat various surfaces
bio-fla-vo-noid \bi-'flā-və-'nōid \ *n* (1952) : any of various biologically active flavonoids (as hesperidin and quercetin) derived from plants and found esp. in fruits and vegetables (as citrus fruits)
bio-foul-ing \bi-'fau-līŋ \ *n* (1943) : the gradual accumulation of waterborne organisms (as bacteria and protozoa) on the surfaces of engineering structures in water that contributes to corrosion of the structures and to a decrease in the efficiency of moving parts
bio-fuel \bi-'fyū(-ə)l \ *n* (1970) : a fuel (as wood or ethanol) composed of or produced from biological raw materials — compare **FOSSIL FUEL**
biog *abbr* biographer; biographical; biography
bio-gas \bi-'ō-'gas \ *n* (1971) : a mixture of methane and carbon dioxide produced by the bacterial decomposition of organic wastes and used as a fuel
bio-gen-e-sis \bi-'ō-'je-nə-səs \ *n* [NL] (1870) 1 : the development of life from preexisting life 2 : the synthesis of chemical compounds or structures in the living organism — compare **BIOSYNTHESIS** — **bio-gen-et-ic** \bi-'jē-ne-tik \ *adj* — **bio-ge-net-i-cal-ly** \bi-'jē-ne-ti-kəl \ *adv*
biogenetic law *n* (1882) : the theory of ontogenetic recapitulation
bio-gen-ic \bi-'jē-nik \ *also* **bi-og-e-nous** \bi-'ō-'jā-nəs \ *adj* (1903) : produced by living organisms (~ methane formation)
bio-geo-chem-i-cal \bi-'jē-ō-'ke-mi-kəl \ *n* (1938) : of or relating to the partitioning and cycling of chemical elements and compounds between the living and nonliving parts of an ecosystem — **bio-geo-chem-is-try** \bi-'jē-ō-'strē \ *n*
bio-geo-gra-phy \bi-'jē-ō-'grā-fē \ *n* [ISV] (1894) : a science that deals with the geographical distribution of animals and plants — **bio-geo-gra-pher** \bi-'jē-ō-'grā-fər \ *n* — **bio-geo-graph-ic** \bi-'jē-ō-'grā-fik \ *or* **bio-geo-graph-i-cal** \bi-'jē-ō-'grā-fik \ *adj*
bio-gra-pher \bi-'ō-'grā-fē \ *also* **bē-** \ *n* (1841) : a person about whom a biography is written
bio-gra-pher \bi-'ō-'grā-fər \ *n* (1702) : a writer of a biography
bio-graph-i-cal \bi-'ō-'grā-fī-kəl \ *also* **bio-graph-ic** \bi-'fīk \ *adj* (1714) 1 : of, relating to, or constituting biography 2 : consisting of biographies (~ a dictionary) 3 : relating to a list briefly identifying persons (~ notes) — **bio-graph-i-cal-ly** \bi-'ō-'grā-fī-kəl \ *adv*
bio-gra-phy \bi-'ō-'grā-fē \ *also* **bē-** \ *n*, *pl* -**phies** [LGk *graphia*, fr. Gk *bi-* + *graphia* -graphy] (1683) 1 : a usu. written history of a person's life 2 : biographical writings as a whole 3 : an account of the life of something (as an animal, a coin, or a building)
bio-haz-ard \bi-'ō-'hā-zərd \ *n* (1967) : a biological agent or condition that is a hazard to humans or the environment; *also* : a hazard posed by such an agent or condition — **bio-haz-ard-ous** \bi-'ō-'hā-zərdəs \ *adj*
bio-iden-ti-cal \bi-'ō-'ī-den-ti-kəl \ *adj* (1997) : having the same molecular structure as a substance produced in the body (~ estrogens)
bio-in-for-mat-ics \bi-'ō-'in-fər-'ma-tiks \ *n* *pl* but *sing* in *constr* (1988) : the collection, classification, storage, and analysis of biochemical and biological information using computers esp. as applied to molecular genetics and genomics — **bio-in-for-mat-ic** \bi-'ō-'tik \ *adj*
biol *abbr* biologic; biological; biologist
bi-o-log-ic \bi-'ō-'lā-jik \ *or* **bi-o-log-i-cal** \bi-'i-'kəl \ *n* (1921) : a biological product (as a vaccine or blood serum) used in medicine
biological *also* **biologic** *adj* (1847) 1 : of or relating to biology or to life and living processes 2 : used in or produced by applied biology 3 : connected by direct genetic relationship rather than by adoption or marriage (~ her ~ father) — **bi-o-log-i-cal-ly** \bi-'i-'kəl \ *adv*
biological clock *n* (1955) : an inherent timing mechanism in a living system that is inferred to exist in order to explain the timing or periodicity of various behaviors and physiological states and processes
biological control *n* (1921) 1 : the reduction in numbers or elimination of pest organisms by interference with their ecology (as by the in-

\ə \ *about* \k \ *kitten*, *F table* \ər \ *further* \ə \ *ash* \ā \ *ace* \ā \ *mop*, *mar* \au \ *out* \ch \ *chin* \ē \ *bet* \ē \ *easy* \g \ *go* \i \ *hit* \i \ *ice* \i \ *job* \j \ *sing* \ō \ *go* \ō \ *law* \oi \ *boy* \th \ *thin* \th \ *the* \ū \ *loot* \u \ *foot* \y \ *yet* \zh \ *vision*, *beige* \k, ʰ, æ, u, ʰ \ *see* *Guide to Pronunciation*

production of parasites or diseases) 2 : an agent used in biological control
biological oxygen demand *n* (1930) : BIOCHEMICAL OXYGEN DEMAND
biological warfare *n* (1946) : warfare involving the use of biological weapons; also : warfare involving the use of herbicides
biological weapon *n* (1947) : a harmful biological agent (as a pathogenic microorganism or a neurotoxin) used as a weapon to cause death or disease usu. on a large scale
biolo-gism \bi-ō-lō-jī-zəm/ *n* (1920) : the use of biological explanations in the analysis of social situations — **biolo-gis-tic** \bi-lō-jis-tik/ *adj*
biolo-gy \bi-ō-lō-jē/ *n* [G *Biologie*, fr. *bi-* + *-logie* -logy] (1819) 1 : a branch of knowledge that deals with living organisms and vital processes 2 a : the plant and animal life of a region or environment b : the life processes esp. of an organism or group; broadly : ECOLOGY — **biolo-gist** \bi-lō-jist/ *n*
biolu-min-es-cence \bi-ō-lū-mā-ne-sən(t)s/ *n* [ISV] (1916) : the emission of light from living organisms; also : the light so produced — **biolu-min-es-cent** \bi-ō-lū-mā-ne-sən(t)/ *adj*
bio-mark-er \bi-ō-mār-kər/ *n* (1982) : a distinctive biological or biologically derived indicator (as a metabolite) of a process, event, or condition (as aging, disease, or oil formation)
bio-mass \bi-ō-mas/ *n* (1934) 1 : the amount of living matter (as in a unit area or volume of habitat) 2 : plant materials and animal waste used esp. as a source of fuel
bio-ma-te-ri-al \bi-ō-mā-tēr-ē-əl/ *n* (1966) : a natural or synthetic material (as a metal or polymer) that is suitable for introduction into living tissue esp. as part of a medical device (as an artificial joint)
bio-math-e-mat-ics \bi-mā-thē-mā-tiks, -math-mā-/ *n pl* but *sing* in *constr* (1923) : mathematics of special use in biology and medicine — **bio-math-e-mat-i-cal** \bi-mā-thē-mā-tik/ *adj* — **bio-math-e-ma-ti-cian** \bi-mā-thē-mā-ti-shən, -mā-thē-/ *n*
bi-ome \bi-ōm/ *n* [bi- + *-ome*] (1916) : a major ecological community type (as tropical rain forest, grassland, or desert)
bio-me-chan-ics \bi-ō-mā-kā-niks/ *n pl* but *sing* or *pl* in *constr* (ca. 1933) : the mechanics of biological and esp. muscular activity (as in locomotion or exercise); also : the scientific study of this — **bio-me-chan-i-cal** \bi-ō-mā-kā-nik/ *adj* — **bio-me-chan-i-cal-ly** \bi-ō-mā-kā-nik-ē/ *adv*
bio-med-i-cal \bi-ō-mē-di-kəl/ *adj* (1926) 1 : of or relating to biomedicine 2 : of, relating to, or involving biological, medical, and physical science
biomedical engineering *n* (1961) : BIOENGINEERING 1 — **biomedical engineer** *n*
bio-med-i-cine \bi-ō-mē-dī-sən, Brit usu. -med-sən/ *n* (1923) : medicine based on the application of the principles of the natural sciences and esp. biology and biochemistry
bio-me-te-o-ro-l-o-gy \bi-mē-tē-ō-rā-lō-jē/ *n* (1946) : a science that deals with the relationship between living things and atmospheric phenomena — **bio-me-te-o-ro-log-i-cal** \bi-mē-tē-ō-rā-lō-jik/ *adj* — **bio-me-te-o-ro-l-o-gist** \bi-mē-tē-ō-rā-lō-jist/ *n*
bio-met-ric \bi-ō-mē-trik/ *adj* also **bio-met-ri-cal** \bi-ō-mē-tri-kəl/ *adj* (1901) : of, relating to, or utilizing biometrics or biometry
biometrics \bi-ō-mē-triks/ *n pl* but *sing* or *pl* in *constr* (1902) 1 : BIOMETRY 2 : the measurement and analysis of unique physical or behavioral characteristics (as fingerprint or voice patterns) esp. as a means of verifying personal identity
bi-om-e-try \bi-ō-mā-trē/ *n* [ISV] (1901) : the statistical analysis of biological observations and phenomena — **bi-om-e-tri-cian** \bi-ō-mē-tri-shən/ *n*
bio-mi-net-ics \bi-ō-mā-mē-tiks, -mī-/ *n pl* but *sing* in *constr* (1974) : the study of the formation, structure, or function of biologically produced substances and materials (as enzymes or silk) and biological mechanisms and processes (as protein synthesis or photosynthesis) esp. for the purpose of synthesizing similar products by artificial mechanisms which mimic natural ones — **bio-mi-net-ic** \bi-ō-mā-mē-tik/ *adj*
bio-min-er-al-i-za-tion \bi-ō-mī-nēr-āl-ē-zā-shən, -mī-nēr-/ *n* (1973) : the formation or accumulation of minerals by organisms esp. into biological tissues or structures (as bones, teeth, and shells) — **bio-min-er-al** \bi-ō-mī-nēr-āl, -mī-nēr-/ *adj*
bio-mol-e-cule \bi-ō-mā-lē-kyū/ *n* (1901) : an organic molecule and esp. a macromolecule (as a protein or nucleic acid) in living organisms — **bio-mol-e-cu-lar** \bi-ō-mā-lē-kyū-lər/ *adj*
bio-mor-phic \bi-ō-mōr-fik/ *adj* (1895) : resembling or suggesting the forms of living organisms (~ sculptures) (~ images)
bi-on-ic \bi-ō-nik/ *adj* (1963) 1 : of or relating to bionics 2 : having normal biological capability or performance enhanced by or as if by electronic or electromechanical devices
bi-on-ics \bi-ō-niks/ *n pl* but *sing* or *pl* in *constr* [bi- + *-onics* (as in *electronics*)] (1960) : a science concerned with the application of data about the functioning of biological systems to the solution of engineering problems
bi-o-nom-ics \bi-ō-nā-miks/ *n pl* but *sing* or *pl* in *constr* [bionomic, *adj.*, prob. fr. *Bionomique*, fr. *bionomie* ecology, fr. *bi-* + *-nomie* -nomy] (1888) : ECOLOGY — **bi-o-nom-ic** \bi-ō-nom-ik/ *adj*
bio-pes-ti-cide \bi-ō-pes-tī-sīd/ *n* (1980) : a pesticide consisting of naturally occurring or genetically engineered microorganisms (as bacteria)
bio-phar-ma-ceu-ti-cal \bi-ō-fār-mā-sū-ti-kəl/ *n* (1985) : a pharmaceutical derived from biological sources and esp. one produced by biotechnology — **biopharmaceutical** *adj*
bio-phil-a \bi-ō-fī-lē-ə, -fēl-yə/ *n* [NL] (1979) : a hypothetical human tendency to interact or be closely associated with other forms of life in nature
bio-phys-ics \bi-ō-fī-ziks/ *n pl* but *sing* or *pl* in *constr* (1892) : a branch of science concerned with the application of physical principles and methods to biological problems — **bio-phys-i-cal** \bi-ō-fī-zik/ *adj* — **bio-phys-i-cist** \bi-ō-fī-zis-t, -fiz-sist/ *n*
bio-pic \bi-ō-pik/ *n* [bi- + *-pic*] (1951) : a biographical movie
bio-poly-mer \bi-ō-pō-lē-mər/ *n* (1961) : a polymeric substance (as a protein or polysaccharide) formed in a biological system
bio-pros-pect \bi-ō-prō-spekt/ *vt* (1996) : to search for substances that are produced by living organisms and may be of medicinal or commercial value — **bio-pros-pec-tor** \bi-ō-prō-spekt-ər/ *n*

bi-op-sy \bi-ōp-sē/ *n, pl -sies* [ISV *bi-* + *-opsy* (as in *autopsy*)] (1895) : the removal and examination of tissue, cells, or fluids from the living body — **biopsy** *v*
bio-psy-cho-l-o-gy \bi-ō-sī-kā-lō-jē/ *n* (1909) : PSYCHOBIOLOGY
bio-psy-cho-log-i-cal \bi-ō-sī-kā-lō-jik/ *adj* — **bio-psy-cho-l-o-gist** \bi-ō-sī-kā-lō-jist/ *n*
bio-re-ac-tor \bi-ō-rē-āk-tər/ *n* (1974) : a device or apparatus in which living organisms and esp. bacteria synthesize useful substances (as interferon) or break down harmful ones (as in sewage)
bio-re-gion \bi-ō-rē-jōn/ *n* (1978) : a region whose limits are naturally defined by topographic and biological features (as mountain ranges and ecosystems) — **bio-re-gion-al** \bi-ō-rē-jō-nəl, -rē-jā-nəl/ *adj*
bio-re-gion-al-ism \bi-ō-rē-jō-nāl-iz-m, -rē-jā-nāl-ē-/ *n* (1981) : an environmentalist movement to make political boundaries coincide with bioregions — **bio-re-gion-al-ist** \bi-ō-rē-jō-nāl-ist, -ist/ *n or adj*
bio-re-me-di-a-tion \bi-ō-rē-mē-dē-ā-shən/ *n* (1986) : the treatment of pollutants or waste (as in an oil spill, contaminated groundwater, or an industrial process) by the use of microorganisms (as bacteria) that break down the undesirable substances
bio-rhythm \bi-ō-ri-thəm/ *n* (1960) : an innately determined rhythmic biological process or function (as sleep behavior); also : the internal mechanism that determines such a process or function — **bio-rhyth-mic** \bi-ō-ri-thm-ik/ *adj*
BIOS *abbr* Basic Input/Output System
bio-safe-ty \bi-ō-sāf-tē/ *n* (1977) : safety with respect to the effects of biological research on humans and the environment
bio-science \bi-ō-sī-əns(t)s/ *n* (1941) : BIOLOGY 1; also : LIFE SCIENCE — **bio-scien-tif-ic** \bi-ō-sī-ən-ti-fik/ *adj* — **bio-scien-tist** \bi-ō-sī-ən-tist/ *n*
bio-se-cu-rity \bi-ō-sē-sī-kūr-ē-tē/ *n* (1985) : security from exposure to harmful biological agents; also : measures taken to ensure this security
bio-sen-sor \bi-ō-sen-sər, -sen(t)-sər/ *n* (1962) : a device that monitors and transmits information about a life process; esp. : a device consisting of a biological component (as an enzyme or bacterium) that reacts with a target substance and a signal-generating electrochemical component that detects the resulting products or by-products
-blosis *n comb form, pl -bloses* [NL, fr. Gk *blosis*, fr. *bloun* to live, fr. *bios* life — more at *quick*] : mode of life (parabiosis)
bio-so-cial \bi-ō-sō-shəl/ *adj* (1897) : of, relating to, or concerned with the interaction of the biological aspects and social relationships of living organisms (~ science) — **bio-so-cial-ly** \bi-ō-sō-shəl-ē, -sō-shē-/ *adv*
bio-soil-id \bi-ō-sā-lēd/ *n* (1990) : solid organic matter recovered from a sewage treatment process and used esp. as fertilizer — usu. used in *pl*
bio-sphere \bi-ō-sfīr/ *n* (1899) 1 : the part of the world in which life can exist 2 : living organisms together with their environment — **bio-spher-ic** \bi-ō-sfīr-ik, -sfer-, -sfe-rik/ *adj*
bio-sta-tis-tics \bi-ō-stā-tis-tiks/ *n pl* but *sing* in *constr* (1949) : statistics applied to the analysis of biological data — **bio-sta-tis-ti-cal** \bi-ō-stā-tis-tik/ *adj* — **bio-stat-is-ti-cian** \bi-ō-stā-tis-ti-shən/ *n*
bio-strat-i-graphy \bi-ō-strā-ti-grā-fē/ *n* [ISV] (1926) 1 : the identification of fossils found within sedimentary rock strata as a method of determining the relative geologic age of the rock; also : the branch of paleontology involving such identification 2 : the arrangement of fossils in rock strata — **bio-strat-i-graph-ic** \bi-ō-strā-ti-grā-fik/ *adj*
bio-syn-the-sis \bi-ō-sīn(t)-thē-sīs/ *n* [NL] (1930) : the production of a chemical compound by a living organism — **bio-syn-thet-ic** \bi-ō-sīn-tē-tik/ *adj* — **bio-syn-thet-i-cal-ly** \bi-ō-sīn-tē-tik-ē/ *adv*
bio-sys-tem-at-ics \bi-ō-sis-tē-mā-tiks/ *n pl* but *sing* or *pl* in *constr* (1945) : taxonomy esp. as based on cytogenetics and genetics — **bio-sys-tem-at-ic** \bi-ō-sis-tē-mā-tik/ *adj* — **bio-sys-tem-at-ist** \bi-ō-sis-tē-mā-tist, -sist-ē-mā-/ *n*
bio-ta \bi-ō-tā/ *n* [NL, fr. Gk *biotē* life; akin to Gk *bios*] (1901) : the flora and fauna of a region
bio-tech \bi-ō-tek/ *n* (1974) : BIOTECHNOLOGY 1
bio-tech-ni-cal \bi-ō-tek-ni-kəl/ *adj* (1938) : of or relating to biotechnology
bio-tech-nol-o-gy \bi-ō-tek-nā-lō-jē/ *n* (1941) 1 : the manipulation (as through genetic engineering) of living organisms or their components to produce useful usu. commercial products (as pest resistant crops, new bacterial strains, or novel pharmaceuticals); also : any of various applications of biological science used in such manipulation 2 : ERGONOMICS 1 — **bio-tech-no-log-i-cal** \bi-ō-tek-nā-lō-jik/ *adj* — **bio-tech-no-log-i-cal-ly** \bi-ō-tek-nā-lō-jik-ē/ *adv* — **bio-tech-nol-o-gist** \bi-ō-tek-nā-lō-jist/ *n*
bio-te-lem-e-try \bi-ō-tē-lē-mē-trē/ *n* (1963) : the remote detection and measurement of a human or animal function, activity, or condition (as heart rate or body temperature) — **bio-tel-e-met-ric** \bi-ō-tē-lē-mē-trik/ *adj*
bio-ter-ror \bi-ō-tēr-ər, -tēr-ər/ *n, often attrib* (1991) : BIOTERRORISM
bio-ter-ror-ism \bi-ō-tēr-ər-iz-m, -tēr-ər-ē-/ *n* (1991) : terrorism involving the use of biological weapons — **bio-ter-ror-ist** \bi-ō-tēr-ər-ist, -tēr-ər-ist/ *adj or n*
bi-ot-ic \bi-ō-tik/ *adj* [Gk *biōtikos*, fr. *bioun*] (1868) : of, relating to, or caused by living organisms (~ diversity)
-biotic *adj comb form* [prob. fr. NL *bioticus*, fr. Gk *biōtikos*] : having a (specified) mode of life (endobiotic)
biotic potential *n* (1928) : the inherent capacity of an organism or species to reproduce and survive
bi-o-tin \bi-ō-tən/ *n* [ISV, fr. Gk *biotas* life, sustenance; akin to Gk *bios*] (1936) : a colorless crystalline growth vitamin C₁₂H₁₄N₂O₃ of the vitamin B complex found esp. in yeast, liver, and egg yolk
bi-o-tite \bi-ō-tīt/ *n* [G *biotit*, fr. Jean B. Biot (1862 Fr. mathematician)] (1862) : a generally black or dark green form of mica that is a constituent of crystalline rocks and consists of a silicate of iron, magnesium, potassium, and aluminum — **bi-o-tit-ic** \bi-ō-tīt-ik/ *adj*
bio-tope \bi-ō-tōp/ *n* [bi- + *Gk topos* place] (1927) : a region uniform in environmental conditions and in its populations of animals and plants for which it is the habitat
bio-tox-in \bi-ō-tāks-sən/ *n* (1927) : a toxic substance of biological origin
bio-trans-for-ma-tion \bi-ō-tran(t)s-fər-mā-shən, -fōr-/ *n* (1955) : the transformation of chemical compounds within a living system
bio-tur-ba-tion \bi-ō-tər-bā-shən/ *n* [ISV] (1967) : the restructuring of sedimentary deposits (as in a lake bottom or seabed) by moving organisms (as worms and burrowing clams) — **bio-tur-bat-ed** \bi-ō-tər-bād-/ *adj*
