Inv. No. 337-TA-1478

**COMPLAINANTS' MOTION IN *LIMINE* NO. 3 TO PRECLUDE TESTIMONY ON
UNPRODUCED DOCUMENTS AND EVIDENCE FOR OURA'S OWN ALLEGED
PRIOR ART PRODUCT, OURA RING 1**

Complainants Samsung Electronics Co., Ltd. and Samsung Electronics America, Inc. (collectively, “Samsung” or “Complainants”) respectfully move in *limine* to exclude Respondents Ouraring Inc. and Oura Health Oy (collectively, “Oura” or “Respondents”) from presenting any testimony at the hearing regarding its alleged prior art product, Oura Ring Gen 1 (“Ring 1”) based on documents or other evidence that Oura failed to produce during discovery.

GROUND RULE 5.1 CERTIFICATION

Pursuant to Ground Rule 5.1, counsel for Complainants certify that they made reasonable, good-faith efforts to resolve this matter with Respondents before filing this motion. Samsung sent its motion *in limine* topics to Oura on August 20, 2026, and met and conferred on those topics on August 24, 2026. Respondents oppose this motion.

I. INTRODUCTION

Oura asserts that its first generation ring product, the Oura Ring Gen. 1 (“Ring 1”), is prior art to three of Samsung’s asserted patents, U.S. Patent Nos. 10,231,675 (“’675 Patent”), 10,945,677 (“’677 Patent”), and 10,978,789 (“’789 Patent”). However, though Samsung requested information about Ring 1 throughout discovery, none of Oura’s deponents and no one on Oura’s witness list is knowledgeable about facts that could substantiate the Ring 1 as prior art, such as its timeline of development, public use, or sale. Oura also did not produce relevant technical documents for the Ring 1, including electronic design files needed to show that the Ring 1 disclosed the claim elements of the ’789 Patent, including those that require electrical connections across the Ring 1’s printed circuit board (“PCB”).

In its Prehearing Brief, Oura indicated its intent to fill those gaps in proof for Ring 1 at the evidentiary hearing with testimony from two Oura engineers, Michael Larson and Miguel Christophy. But neither Mr. Larson nor Mr. Christophy has personal knowledge of these facts. They both only joined Oura within the past two years, nearly a decade after Ring 1 first went on sale in late-2015. Under oath during their depositions, both disclaimed any knowledge of the Ring 1’s timeline of development, public use, or sale, despite being designated on Rule 30(b)(6) topics relating to Ring 1. The only way for Oura to fill the gaps in its Ring 1 invalidity case with Michael Larson and Miguel Christophy is to have them become newly educated on Ring 1’s timeline and PCB structure through (1) documents that Oura never produced or (2) off-record conversations with Oura employees who were never deposed or identified on any witness list.

To allow Oura to proceed would be to allow Oura to ambush Samsung at the hearing with information that was never made available to Samsung during discovery and that Samsung was never able to test or rebut. The Commission’s procedural rules regarding discovery exist to prevent

precisely this kind of gamesmanship. Oura should be precluded from offering any new testimony at the hearing based on evidence not produced during discovery.

II. LEGAL STANDARDS

Federal Rule of Civil Procedure 37 states that “[i]f a party fails to provide information or identify a witness as required by Rule 26(a) or (e), the party is not allowed to use that information or witness to supply evidence on a motion, at a hearing, or at a trial, unless the failure was substantially justified or is harmless.” Fed. R. Civ. P. 37; *see also, e.g., Memry Corp. v. Kentucky Oil Tech., N.V.*, 2007 WL 4208317, at *4 (N.D. Cal. Nov. 27, 2007) (“As a general proposition, no party will be allowed to offer facts or documents that were not disclosed in discovery that go beyond information provided in discovery.”); *Weitz Co., L.L.C. v. MacKenzie House, L.L.C.*, 2009 WL 10705142, at *2 (W.D. Mo. Dec. 2, 2009) (“Plaintiff should not be permitted to present evidence that was not disclosed during discovery if that evidence should have been disclosed. This is not a discovery dispute: a document that was not (but should have been) produced during discovery cannot be introduced at trial.”).

Indeed, in order to prevent trial by ambush, “[e]vidence that was not produced during discovery is routinely excluded” by this Court. *Certain Automated Teller Machines, ATM Prods., Components Thereof, & Prods. Containing the Same*, Inv. No. 337-TA-972, Order No. 29, 2016 WL 5076112, at *1 (Aug. 24, 2016); *see also, e.g., Certain Digital Media Devices, Including Televisions, Blu-Ray Disc Players, Home Theater Sys., Tablets & Mobile Phones, Components Thereof & Associated Software*, Inv. No. 337-TA-882, Order No. 43, 2014 WL 718353, at *1 (Feb. 14, 2014) (granting motion in *limine* where “[t]he documents contained in the exhibits were not produced before the close of fact discovery, were not relied on in respondents’ expert reports, were not disclosed according to the procedural requirements concerning prior art, and indeed were not disclosed until the deposition of one of [complainant]’s experts.”); *Certain Digital Models, Digital*

No. 337-TA-833, Order No. 32, 2013 WL 354005, at *2 (Jan. 24, 2013) (holding that precluding a party from relying on evidence that was not timely produced “prevents trial by ambush, and ensures that the hearing is conducted in a fair manner”).

III. ARGUMENT

The timely production of evidence is an important requirement of an investigation because it “ensures that the hearing is conducted in a fair manner.” *Certain Digital Models*, 2013 WL 354005, at *2. Oura’s Prehearing Brief makes clear that it has no intention of being limited by the discovery record. Rather, to patch fatal holes in its invalidity case for its own Ring 1 product, Oura’s Prehearing Brief reveals that it will attempt to use its fact witnesses, Mr. Larson and Mr. Christophy, to provide testimony (1) about topics for which those same witnesses disclaimed any knowledge in deposition and (2) about the contents of documents that were never produced in this investigation. *See, e.g.*, Exhibit 1 (Respondents’ Prehearing Brief, excerpted) at 23, 157. Oura should be precluded from doing so, as Samsung would be unduly prejudiced by new evidence presented for the first time at the hearing.

A. **Oura Fact Witnesses, Mr. Larson and Mr. Christophy, Cannot Testify About Ring 1’s Timeline, Which Oura Claimed Was Outside the Scope Or For Which Those Witnesses Disclaimed Knowledge**

Despite relying on its own Ring 1 product as prior art, Oura has never produced a deponent or identified anyone on its witness list who can establish that the Ring 1 actually predates Samsung’s asserted ’677 and ’675 Patents. The available evidence shows that they were not: Oura’s press releases from 2015 stated that Ring 1 would only start shipments to customers in November 2015—*after* the August 12, 2015 priority date of the ’677 and ’675 Patents. *See* Exhibit

[REDACTED]

2 (RX-0023) at RX-0023.0011 (Oura press release for Ring 1, stating “We are ready to ship in November 2015”); *see also* Ex. 3 (Complainants’ Prehearing Brief, excerpted) at 34-36.¹

In an attempt to rectify this fatal deficiency, Oura’s Prehearing Brief states that it intends to use Mr. Christophy and Mr. Larson to establish a different Ring 1 timeline. *See* Ex. 1 (Respondents’ Prehearing Brief, excerpted) at 23 (“As Dr. Mortazavi will testify, and Mr. Christophy and Mr. Larson will corroborate, the Oura Ring Gen 1 was fixed in its design and functionality at least as early as June 2015.”). But during fact discovery, Oura never produced a deponent knowledgeable about the Ring 1’s timeline, as Mr. Larson and Mr. Christophy disclaimed any knowledge about that subject.

To be sure, Samsung sought discovery on this important topic. Samsung’s 30(b)(6) notice included topics that encompassed the Ring 1. For example, Topic No. 26 requests testimony regarding “The factual basis for [Oura’s] contentions that the Asserted Patents are invalid, including Prior Art that [Oura] contend[s] renders the Asserted Patents anticipated or obvious.” *See* Ex. 4 (Samsung 30(b)(6) Deposition Notice to Oura, excerpted) at Topic No. 26. Both parties understood that Ring 1 was encompassed under this topic, as Oura was asserting it as prior art. *See* Ex. 5 (Oura Responses to Samsung 30(b)(6) Notice, excerpted) at Topic No. 26 (“To the extent this Topic seeks factual details regarding the design and operation of the Oura Ring 1, Oura will provide a witness to testify regarding this Topic”). Indeed, Oura designated Mr. Christophy and Mr. Larson as knowledgeable about Ring 1. Ex. 6 (Oura email with topic designations).

¹ Oura also failed to produce any sales data for the Ring 1 at all, much less any data that shows an earlier date of sale than November 2015. Oura witnesses cannot testify at the hearing to suggest earlier sales based on sales documents that Oura never produced.

But in depositions of both witnesses, Oura's counsel repeatedly objected to, and took the position that, questions related to the timeline and other facts relevant to establishing Ring 1 as prior art were outside the scope of the 30(b)(6) designations for those witnesses:

Q. Do you know the exact date when it was on sale in the U.S.?

MR. NOLAN: Objection. *Outside the scope of what this witness has been designated for.* To the extent that he has personal knowledge, he can provide that to counsel.

Exhibit 7 (JDX-0025C (Christophy Dep. Tr.)) at 25:18-26:1 (emphasis added).

Q. And you can't put even a month on when Oura Ring 1 was released or put on sale in the U.S[.], correct?

MR. NOLAN: Objection; *outside the scope of the deposition;* to the extent it calls for a legal conclusion; as well as asked and answered.

Exhibit 8 (JDX-0026C (Larson Dep. Tr.)) at 63:2-7 (emphasis added). Any new testimony from either Mr. Christophy or Mr. Larson related to the Ring 1 development timeline should be precluded on that basis alone.

Moreover, when Mr. Christophy and Mr. Larson answered questions about Ring 1's history in their personal capacities, both disclaimed any knowledge on that subject. Mr. Larson, for example, only joined Oura in June 2025, and he accordingly testified to knowing nothing about Ring 1's history or dates of sale:

Q. You were not a customer/user of Oura 1, correct?

A. Correct.

Q. And you can't recall the date when you first learned of the Oura 1, correct?

A. Correct.

Q. And you can't put even a month on when Oura Ring 1 was released or put on sale in the U.S[.], correct?

THE WITNESS: I cannot.

Q. So you don't know if it was in 2015 or 2016, for example, correct?

THE WITNESS: I still cannot, no.

Exhibit 8 (JDX-0026C (Larson Dep. Tr.)) at 62:21-63:13.

Mr. Christophy similarly joined Oura only recently in October 2024 and admitted that he was “not involved with the development design of Oura [Ring] 1” in “any way, shape, or form” and knew nothing about the product at the time it was on sale, beyond that “it existed”:

Q. Oura 1, as you mentioned, released sometime in 2015. So you definitely were not involved with the development design of Oura 1, correct?

A. Yeah, I was not personally engaged or involved with Oura in any way, shape, or form, and I wasn’t there for the Gen 1 development.

Q. You also weren’t there the whole time period where Oura Ring was on sale either, correct?

A. I believe that to be -- that’s correct, yeah.

Exhibit 7 (JDX-0025C (Christophy Dep. Tr.)) at 40:14-25.

Q. So any knowledge you have about Oura Ring 1 came from preparing for today’s deposition?

...

THE WITNESS: I was familiar that it existed.

BY MR. LIANG: Q. Well, beyond that, I mean.

...

THE WITNESS: Yeah. As it pertains to the detailed -- I would say detailed design of Oura Ring 1, I -- I didn’t really have too much knowledge, if any, of that prior to the preparation of this deposition.

Id. at 41:9-23 (objections omitted).

Having asserted complete ignorance of Ring 1’s timeline in deposition, Mr. Larson and Mr. Christophy cannot credibly claim to have personal knowledge of critical facts on that very subject at the hearing. Because they did not work at Oura until many years after the relevant time, any new facts that Mr. Larson and Mr. Christophy learn about Ring’s timeline must be based on undisclosed, off-the-record conversations with Oura employees who were employed by Oura in 2015, likely Tero Vallius and Marjut Uusitalo, who are both located in Finland. Oura’s invalidity expert, Dr. Mortazavi, relied on off-record conversations with those two Oura employees in Finland to support dates of public use for Ring 1 in 2015 in his opening report, served after the close of fact discovery. *See* Exhibit 9 (JDX-0001C (Mortazavi Opening Report)), ¶¶1321, 1329.

[REDACTED]

Oura’s fact witnesses should not be permitted to testify based on conversations they may have had with Mr. Vallius or Ms. Uusitalo (or anyone else) *after* their depositions. Neither Mr. Vallius nor Ms. Uusitalo were ever deposed in this Investigation and neither has ever appeared on Oura’s witness lists.² Ex. 10 (May 1, 2026 Oura Tentative Witness List); Ex. 11 (Oura Prehearing Statement, excerpted). Accordingly, it would be highly prejudicial to permit any of Oura’s witnesses, including Mr. Larson and Mr. Christophy, to testify regarding Ring 1’s timeline based on hearsay discussions with individuals who were never subject to discovery and will not appear at the hearing. *See Certain Digital Models*, 2013 WL 354005, at *2 (precluding a party from relying on evidence that was not timely produced “prevents trial by ambush, and ensures that the hearing is conducted in a fair manner”).

For these same reasons, Oura’s expert Dr. Mortazavi should also be precluded from relying on conversations with Mr. Vallius and Ms. Uusitalo in providing any opinions at the hearing. It would be prejudicial to Samsung to allow Dr. Mortazavi to testify about any conversations he had with these Oura employees, as they never appeared on any witness lists, were never deposed, and will not testify at trial. As a result, Samsung was not able to test or rebut any of the hearsay information that Dr. Mortazavi obtained from his conversations with those employees.

B. Oura Fact Witnesses Cannot Testify About Contents of Electronic Design Files For Ring 1 that Oura Never Produced

To support its invalidity arguments for Ring 1 and the ’789 Patent, Oura intends to offer Mr. Christophy “to testify that the Oura Ring Gen. 1 [REDACTED]

² On May 27, 2026—just two days before the close of discovery and a month after the due date for witness lists—Oura offered depositions of Mr. Vallius and Ms. Uusitalo in Finland and stated that it intended to move to amend its witness list to add both employees. Samsung objected to Oura’s eleventh-hour proposals and Oura ultimately withdrew its motion to amend its witness list on June 1, 2026, days after filing it on May 29.

[REDACTED]

[REDACTED]

[REDACTED] Exhibit 1 (Respondents’ Prehearing Brief, excerpted) at 157. This relates to the ’789 Patent’s Claim 7 requires a “flexible PCB portion” that includes two “conduction layers,” with each layer “being *electrically connected* with” a corresponding “conduction layer” in two “rigid PCB portions.”

In his deposition, however, Mr. Christophy testified that the sole document that Oura’s expert, Dr. Mortazavi, relies on to establish Ring 1’s internal structure—a “stack-up diagram”—is actually insufficient [REDACTED]

Exhibit 7 (JDX-0025C (Christophy Dep. Tr.)) at 82:14-19, 110:10-13 (testifying that the “stack-up diagram” document “[REDACTED]

[REDACTED].”); *see also* Exhibit 12 (JDX-0052C (Mortazavi Dep. Tr.)) at 445:14-17 (Oura’s expert agreeing that “additional supporting information” is needed, beyond the stack-up). To address the “electrically connected” requirement, Mr. Christophy explained that the relevant evidence are [REDACTED]

[REDACTED]

[REDACTED]. Exhibit 7 (JDX-0025C (Christophy Dep. Tr.)) at 160:7-12.

Oura never produced the electronic design files that Mr. Christophy described as needed to prove (or disprove) the “electrically connected” requirement in the ’789 Patent’s claims. Thus, allowing Mr. Christophy (or any other Oura witness) to offer new testimony either (1) based on the contents of electronic design files that were never produced in this investigation or (2) that could be disproved or undermined by those unproduced documents would severely prejudice Samsung. *See Certain Digital Media Devices*, 2014 WL 718353, at *1 (granting motion *in limine*

where “[t]he documents contained in the exhibits were not produced before the close of fact discovery, were not relied on in respondents’ expert reports, were not disclosed according to the procedural requirements concerning prior art, and indeed were not disclosed until the deposition of one of [complainant]’s experts.”). Samsung never had an opportunity to review the design files, ask about them in depositions of Oura’s fact or expert witnesses, or evaluate whether those files would prove—or disprove—whether Ring 1 satisfies the “electrically connected” requirement. Accordingly, any testimony about unproduced electronic Ring 1 design files and whether they show the “electrical connected” requirement should be excluded. *See Gibbons*, 2017 WL 4882334, at *2 (“And although the Village’s witnesses will be able to testify regarding documents and evidence of which they have knowledge, they are barred from describing any documents that the Village should have but did not produce during discovery.”). Similarly, any testimony that could be *disproved* by those same unproduced design files should be excluded.

IV. CONCLUSION

For the foregoing reasons, Samsung requests that Oura be precluded from offering any evidence or testimony regarding Ring 1 based on unproduced documents or evidence.

In the Matter of

CERTAIN WEARABLE DEVICES

Inv. No. 337-TA-1478

RESPONDENTS' PRE-HEARING BRIEF

IV.B.2, *infra*, the Oura Ring Gen. 1 was in public use and/or available to the public at least prior to August 12, 2015, and accordingly qualifies as prior art to the '675 Patent under at least 35 U.S.C. § 102(a).

U.S. Patent No. 8,948,832 to Hong ("Hong") (RX-0072) was filed on May 30, 2014, and issued February 3, 2015, and therefore qualifies as prior art to the '675 patent under at least 35 U.S.C. § 102(a)(1). Hong discloses a "wearable fitness monitoring device" (and specifically a wrist-worn biometric monitoring device) including "a motion sensor and a photoplethysmographic (PPG) sensor," wherein "[t]he PPG sensor includes (i) a periodic light source, (ii) a photo detector, and (iii) circuitry determining a user's heart rate from an output of the photo detector." JDX-0001C ¶¶2368-70 (citing RX-0072).

U.S. Patent Application Publication No. 2015/0186609 to Utter ("Utter II") (RX-0071) was filed on February 28, 2014, and published July 2, 2015, and therefore qualifies as prior art to the '675 patent under at least 35 U.S.C. § 102(a)(1). Utter II discloses a "wireless data capable strapband" that includes sensors "for generating motion signals in response to body motion (*e.g.*, accelerometry), for generating force signals in response to force exerted by a body portion, for generating biometric signals indicative of biometric activity in the body (*e.g.*, heart rate, respiration, arousal), and for generating location signals based on user location." JDX-0001C ¶¶2368-70 (citing RX-0071).

2. *Availability of the Oura Ring Gen. 1 as Prior Art and the Evidentiary Status of Exhibits Relating to the Oura Ring Gen. 1*

The Oura Ring Gen. 1 was publicly launched by Oura in San Francisco, CA on March 3, 2015. RX-0020; RX-0021 (images and showing Mr. Petteri Lahtela, one of Oura's co-founders, speaking on stage at the March 3, 2015 launch event in San Francisco, CA, wherein RX-0020 is dated March 4, 2014).

As Dr. Mortazavi will testify, and Mr. Christophy and Mr. Larson will corroborate, the Oura Ring Gen 1 was fixed in its design and functionality at least as early as June 2015. According to a Wayback Machine archived capture from August 26, 2015, “[u]ser testing has been done in our team from the beginning of 2015 onward [and] [d]esign of the ring and ring box were frozen in June 2015 after extensive electrical, reliability and environmental testing.” RX-0023 at OURA1478_00001534. Substantial evidence from technical documentation confirms that the design and functionality of the Oura Ring Gen 1 was fixed at least as early as June 2015. *See, e.g.*, RX-0026C (Oura Ring Gen 1 [REDACTED]); RX-0031C (Oura Ring Gen 1 [REDACTED]); RX-0028C (Oura Ring Gen 1 [REDACTED]); RX-0029C (Oura Ring Gen 1 [REDACTED]); RX-0030C (Oura Ring Gen 1 [REDACTED]); RX-0033C (Oura Ring Gen 1 f [REDACTED]). The Oura Ring Gen. 1 also went through substantial product safety testing, including testing required by the FCC, in late May to June, 20215. *See* RX-0036C (emissions test report, June 4, 2015); RX-0037C (emissions test report, June 1, 2015); RX-0038C (emissions test report, May 29, 2015); RX-0039C (emissions test report, June 3, 2015); RX-0040C (emissions test report, May 28, 2015); RX-0041C (voltage dips, short interruptions and voltage variations immunity test, June 9, 2015); RX-0042C (electrical fast transient/burst immunity test, June 8, 2015); RX-0043C (surge immunity test, June 8, 2015); RX-0044C (conducted immunity test report, June 9, 2015); RX-0045C (FCC emissions test report, June 11, 2015); RX-0046C (FCC radiated emissions test report, June 12, 2015); RX-0047C (FCC radiated emissions test report, June 11, 2015); RX-0048C (Environmental and mechanical testing, June 27, 2015) RX-0049C (ESD testing, June 10, 2015). *See also*, JDX-0001C ¶¶1302-21 (opining on evidence).

2. Ground 1: Anticipation in View of Oura Gen. 1 Ring

Claim 7 of the '789 Patent is invalid as anticipated by the Oura Ring Gen. 1, which meets each limitation of this claim as explained herein and as will be shown by the testimony of Dr. Mortazavi. This is especially clear should the opinions of Dr. Warren regarding alleged infringement by the Oura Gen. 4 ring be afforded weight, as claims should be construed in the same for purposes of both anticipation and infringement.

All gone!

Get ÒURA as a very early bird offer. Ring

Oura is a revolutionary wellness ring and app, designed to help you get more restful sleep and perform better. It enables you to learn how your lifestyle choices affect your sleep, and how the quality of your sleep affects your ability to perform.

The Oura ring can automatically tell when you are sleeping. When you go to sleep, the Oura ring analyzes the quality of your rest and recovery by measuring your heart rate (optically), respiration rate, body temperature, and movement. While you are awake, it monitors the duration and intensity of your activities, and the time you spend sitting.

The Oura app integrates and visualizes this data to identify patterns between your sleep quality and daily activities. By understanding how well you slept and recharged, it can determine your readiness to perform and help you adjust the intensity and duration of your day's activities. It can also uncover actionable insights for changes to your daily activities that can help you sleep better.

We've spent years conducting scientific research, building hardware prototypes and developing the algorithms for Oura. The end result is the most advanced wearable wellness device ever created, hidden in a ring that is elegant and ergonomic. A device that can be worn all day and all night. Scratch proof and waterproof, Oura ring is made to be used anywhere, anytime.

created, hidden in a ring that is elegant and ergonomic. A device that can be worn all day and all night. Scratch proof and waterproof, ÖURA ring is made to be used anywhere, anytime.

Help the world become smarter about improving sleep

ÖURA monitors sleep, activity and readiness with laboratory-level accuracy unlike any other wearable device. By getting ÖURA into thousands of fingers we can transform the world's understanding about sleep. We are co-operating with We Are Curious, a personal data platform and community to make it easy for you to share your ÖURA data with leading sleep researchers from around the world. Sharing is optional, but if you choose to do so, you will contribute to a new level of understanding about sleep within the context of normal daily life.

Sleep Better

Sleep better. Recharge yourself.

Sleep quality has a profound impact on your daily performance, well-being and overall quality of life.

ÖURA works wherever and whenever you sleep. There is no need notify the ring or app that you are planning to turn in. ÖURA is so smart that it knows when you are sleeping.

With its proprietary technology and algorithms, the ÖURA ring identifies deep sleep, REM sleep, light sleep, and periods of wakefulness. This information is used to create nightly sleep profiles and to gauge the quality of your sleep. A balanced sleep profile is important to help you recharge your body and mind during sleep.

While you sleep, the ÖURA ring continuously measures your pulse waveform, the exact time between heartbeats, and your body temperature. From these data points it calculates your heart rate, respiration rate and other parameters needed to accurately analyze sleep in order to create your sleep profile.

The sleep profiles produced by ÖURA parallel the profiles produced by the gold standard of sleep laboratory instruments.

Öura helps you choose the right type and timing of activity

If you want to improve your sleep quality, tracking your sleep is not enough. Many other factors, like your physical activities, daily rhythms and lifestyle choices, influence your ability to get restful sleep. ÖURA helps you understand the effect of these factors on your sleep quality.

Your sleep quality and your lifestyle also impact your ability, or readiness, to perform during the day. ÖURA helps you understand how your sleep and activities contribute to your readiness. It can even help you identify which daily practices are most effective at helping you recharge.

During the day, the ÖURA ring automatically measures all your physical activity and time spent sitting. The app delivers actionable recommendations to adjust the intensity, duration and timing of your activities based on your readiness to perform. It also offers activity-related suggestions to help you get more restful sleep at night.

When prompted via the app, the ÖURA ring can also measure your physiological response to activities during the day. This enables ÖURA to learn what practices help you recharge, and to offer suggestions that help you maintain a state of readiness throughout the day.

Readiness Score helps you to optimize performance

ÖURA is designed to help maximize your readiness – your ability to perform at your best both mentally and physically. It's a game-changing perspective on how to go about your life, in order to achieve top performance.

The Readiness Score is a simple measure designed to help you identify days that are ideal for challenging yourself, and those that are better for taking it easy. The score, which is displayed as a percentage, is generated using all of the sensor data, physiological signals, sleep and activity patterns that are monitored by ÖURA.

Sleep is one of the most important variables to get right in order to help sustain both cognitive and physical performance. A night with little deep sleep would have negative impact on your score because deep sleep is important for physical recovery. A good amount of REM sleep is a strong indicator of mental recovery. Variance in your resting heart rate as well as changes in your autonomic nervous system reactions over the time indicate how well your body and mind recharge from the challenges of daily life.

The Readiness Score is just the tip of the iceberg. ÖURA also provides actionable recommendations that help you perform at your best. It even lets you dig into detailed sleep, activity, and readiness dashboards to identify patterns and correlations between your lifestyle choices, your readiness, and sleep quality.

Elegant. Comfortable. Durable. The ÖURA ring

We designed the ŌURA ring to be stunning, comfortable, and simple. Our goal was to create a wellness device that matches seamlessly with your style and daily life. The sophisticated and minimal design will look great anywhere, from the beach to the office, from the yoga studio to the opera and cocktail party.

We chose the ring form factor because it is comfortable to wear for long periods of time, meaning you can wear ŌURA all day and all night. A ring also fits snugly against your skin and is the most convenient place to accurately capture the body signals necessary for measuring and interpreting your sleep, physical activity and performance related indicators.

ŌURA ring is made with a premium ceramic compound that has a beautiful and smooth feel, and comes in a glossy or matte finish. It is also scratch proof and waterproof, so you can take ŌURA anywhere.

The ŌURA ring works without demanding your attention, or distracting you and your lifestyle. The ring knows when you go to sleep, and when you wake up, when you are active, and when you are sitting. It uploads data to your phone automatically. If your phone is not available, it can collect and store data for up to three weeks, as long as you keep wearing and charging it. It's that simple - no actions are required from you.

We want the ŌURA ring to go with you everywhere, and to let you do everything you would normally do.

Actionable recommendations - The ŌURA app

The ŌURA app is a powerful companion to the ring. It delivers personalized and actionable recommendations, and visualizes data regarding your sleep, activity and readiness. It also lets you control settings of your ŌURA ring, and access support content.

control settings of your ŌURA ring, and access support content.

The ŌURA app is easy and intuitive. The sleep, activity and readiness dashboards are designed to let you deep-dive into your daily data. You can also dig into visualizations highlighting longer-term trends and patterns.

ŌURA App gives you deep details of sleep, activity and readiness

ŌURA's groundbreaking recommendation engine functions like a virtual coach committed to improving your sleep quality, performance, and readiness. Over time, it learns about your unique rhythms and provides more personalized advice.

Dramatic Stealth Black Edition

Some of the most exclusive sports cars are stealth black. This inspired us to create a very limited edition of ŌURA Stealth Black.

Manufacturing a dramatic stealth black surface requires an additional level of precision and pushes the limits of manufacturing feasibility. Perfecting the surface requires meticulous, skilled human attention to microscopic details, hence the radically limited quantity and price.

We are ready to ship in November 2015

ŌURA is already much more than just visions and ideas!

Our team has worked hard for over two years, together with our experienced partners. We are past the prototyping phase and already focusing on mass production capability. The ŌURA ring has undergone rigorous testing of reliability and durability, and the time between now and shipping will be mostly spent on fine-tuning the software and user experience. We manufacture ŌURA in Finland, in one of the most advanced electronics manufacturing locations in the world, close to our company's main R&D site. This ensures maximal speed, rapid improvements and premium production quality.

ÖURA + We Are Curious

We're excited to announce our first collaboration with We Are Curious - a personal data platform built around a growing community of individuals who have questions about their sleep, health, and wellness.

With your pledge you will have the option to link your ÖURA data to the Curious platform where you can track additional factors—set up as 'tags' that you can easily track—and see how they influence your sleep quality and performance. Whether you're interested in your daily consumption (caffeine, alcohol, sugar), sleep aids you might be trying (valerian, melatonin, acupuncture) or other factors in your environment (barometric pressure, CO2, pollen count), the Curious platform enables fast and easy manual entry or automated import, as well as graphing and other analytical functions. You can share your questions and discoveries with other Curious users who share your interests.

Collaboration of ÖURA and We Are Curious makes it also possible for you to share your ÖURA data and lifestyle related data with world-leading sleep researchers. Sharing is optional, but if you choose to do so, you will contribute to creating a whole new level of understanding about sleep and performance in the context of normal daily life.

How the world's first wellness ring was created

To arrive at the perfect design, we went through several generations of prototypes and managed to fit all this intelligence into a small, durable ring. Product development began over two years ago with technology studies and concept development. First industrial design mock-ups were fabricated during 2013. We managed to integrate sensors, electronics and battery to the first fully functioning ring prototype in spring 2014. User testing has been done in our team from the beginning of 2015 onward. Design of the ring and ring box were frozen in June 2015 after extensive electrical, reliability and environmental testing.

Multiple generations of prototypes

In an unprecedented way, ÆURA combines insightful jewelry design, elegance and ultimate wearing comfort with top tier science and technology to create absolutely unique user benefits. It is the first product of its kind - world's first ring-size wellness computer and app that provide actionable recommendations to improve sleep, and optimize activity, towards better balance and performance.

We are all set to begin the volume production of the ÖURA ring and timely delivery to our backers in November. Before shipments start we will send you free of charge the complete size range (US6-13) of plastic fitting rings so that you can take your time on choosing your preferred finger for wearing your ÖURA ring and the ring size that matches perfectly with it.

We need you, Kickstarter community to help us ramp up the volume production. We would love to hear your insights to fine-tune the ultimate ÖURA user experience and mobile user interface. We look forward to receiving your feedback on the ring and its daily use as well as wishes for features you might want to have in your ÖURA.

Additional note

ÖURA enthusiasts already exist in 60 countries. We will ship ÖURA worldwide, with the exception of:

- no shipping to the following countries due to US embargo: Iran, Sudan, Syria, North Korea (listed as not fully cooperating) - no shipping to Brazil due to challenges in customs handling.

Please note that shipping to any country outside North America and EU/EFTA may be significantly delayed or even cancelled depending e.g. on the feasibility of local product approval requirements or local import regulations. In a case of cancellation your pledge will be refunded by ÖURA.

Please note that there may be additional duties, fees or taxes raised by the authorities in your country. You may need to take care of them yourself when receiving the shipment.

Risks and challenges

Design

We make a miniature hardware design product with groundbreaking technology and software to go with it. To arrive at the perfect design, we went through several generations of prototypes and managed to fit all this intelligence into a small, durable ring. Together with our experienced partners we have tested materials, mechanics, electronics, software, and their interoperability extensively to make sure everything works at as high a level as we require.

However, despite all this thorough work on all aspects of the product, something surprising may still occur. We are very confident that any emerging challenges can be promptly solved with our collective expertise.

Manufacturing

All the technical and logistical resources involved in the development of ÖURA are located within a 30 min drive from the manufacturer. With this expertise and proximity we can deal with any issues that may arise in person and in real time, and be able to implement any corrective and preventive actions that will be required.

Logistics

We are working with market leading logistics partners. With their world class knowledge and support we can solve any issue that may emerge in our logistics structure. We are confident that you will receive your ÖURA without issues.

Inv. No. 337-TA-1478

COMPLAINANTS' PRE-HEARING BRIEF

[REDACTED]

1. Ground 1: Ring 1 Does Not Anticipate the Asserted Claims of the '675 Patent

a. Ring 1 Is Not Prior Art

Oura cannot show by clear and convincing evidence that Ring 1 is prior art. “[A] party claiming his own prior inventorship must proffer evidence corroborating his testimony.” *Sandt Tech., Ltd. v. Resco Metal & Plastics Corp.*, 264 F.3d 1344, 1350 (Fed. Cir. 2001). Contemporaneous documentary evidence “provides the most reliable proof” of corroboration. *Id.* at 1351. “In contrast to contemporaneous documentary evidence, however, post-invention oral testimony is more suspect, as there is more of a risk that the witness may have a litigation-inspired motive to corroborate the inventor’s testimony.” *Id.*

Oura has not produced any contemporaneous evidence corroborating the Ring 1 code. Instead, code to which Oura points is from at least late 2016, *more than a year after* the August 12, 2015 priority date. See JDX-0009C, ¶¶280-302; CX-1500C, OURA 1478 SC 0000361 [REDACTED]; [REDACTED]; OURA_1478_SC_0000543 [REDACTED]; see also CX-1500C, OURA_1478_SC_0000317 [REDACTED] [REDACTED] [REDACTED]; OURA_1478_SC_0000365 [REDACTED]. Although Oura points to portions of code with comments stating [REDACTED]

[REDACTED] JDX-0009C, ¶¶208-283; JDX-0026C, Larson Tr. 134:8-15 [REDACTED]

[REDACTED] Critically, Oura has not produced a version of the code predating August 12, 2015 such as one that would have been stored by version control software.

Oura continued to modify Ring 1 code after the product was released, as reflected by Oura’s practice of releasing ongoing firmware updates. JDX-0009C, ¶285. The presence of dates from

[REDACTED]

at least 2016 suggest that the Ring 1 code represents a snapshot from on or after that year. As such, the code relied on by Oura reflects these post-release firmware updates. *Id.* [REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

Ring 1 was not sold to the public until November 2015 or later, after the August 12, 2015 priority date and Oura does not contend otherwise. *See* JDX-0004C, ¶300. Oura did not even launch its efforts to raise funds to develop the product, as part of a “Kickstarter campaign” until August 18, 2015, after the priority date. JDX-0004C, ¶300; JDX-0001C, ¶1306. Oura itself targeted delivery of its product for November 2015. RX-0023, OURA1478_00001519 (“Estimated delivery: Nov. 2015”). Oura did not receive FCC RF certification until December 12, 2015, which is a prerequisite for sale in the United States. JDX-0004C, ¶300, CX-1416. And Oura’s corporate witnesses could not identify the month or year Gen 1 was actually sold. JDX-0026C, 63:2-13.

In an attempt to backfill that clear hole in proof, Oura and its expert rely on a conversation from June 2026 that its expert had with two Oura employees, neither of who was deposed in this case and neither of whom will testify at the hearing. *See* . JDX-0001C, ¶¶1321, 1329. Nor does the information either provided have any indicia of reliability since neither is named as authors of the Ring 1 code and one of the employees, Mr. Vallius, did not start working at Oura until May 2015, a mere three months before the priority date and the other, Ms. Uustialo, did not start until

[REDACTED]

the month later as a marketing communications manager.

Trying to buttress its failed code evidence, Oura points to demonstrations of a Ring 1 prototype it alleges to have performed in June and July 2015. JDX-0001C, ¶¶1322-1334. Like the code evidence, Oura’s effort falls well short as it offers no corroborating evidence identifying the sensors or code on those prototypes. In particular, Oura offers no evidence showing that the Ring 1 product as demonstrated in mid-2015 used the same source code dated from late 2016 that Oura cites to evidence the Ring 1’s operation. The Federal Circuit has repeatedly held that even disinterested sworn witness testimony can be insufficient to corroborate assertions of public use of prior art products, particularly with respect to which exact features existed in the prior art product by particular dates. *See, e.g., Woodland Tr. v. Flowertree Nursery, Inc.*, 148 F.3d 1368, 1373 (Fed. Cir. 1998) (oral testimony insufficient to prove public use, regardless of evidence from “undated photographs” where “their lack of detail and clarity cannot have provided documentary support”); *Finnigan Corp. v. Int’l Trade Comm’n*, 180 F.3d 1354, 1366 (Fed. Cir. 1999) (despite published article by disinterested third party describing all but one element of asserted claim, finding oral testimony of prior public use uncorroborated). Here, Oura points only to unsworn discussions between its expert and two employees—far from the type of “disinterested” testimony the Federal Circuit has directed to be viewed with skepticism.

Counsel,

Oura is in the process of getting availabilities of its Oura’s 30(b)(6) deposition witness and topic designations. We'll provide a full list shortly.

In the meantime, one of Oura’s witness, Lindsey Belknap, that will be designated on Topics 27 and 28, is available for deposition next week on May 6th in Boston. She has limited availability before close of fact discovery. Thus, please let us know whether Samsung accepts her offered date as soon as possible, but no later than Friday, May 1st.

RESPONDENTS' PRE-HEARING STATEMENT

TABLE OF EXHIBITS

Exhibit	Description
1	Curriculum Vitae of Bobak Mortazavi, Ph.D.
2	Curriculum Vitae of Patrick Mercier, Ph.D.
3	Curriculum Vitae of John C. Jarosz
4	Respondents' Preliminary Exhibit List
5	Parties' Exchanged Witness Examination Estimates

Pursuant to Ground Rule 11.1 and the Procedural Schedule (Order No. 8), Respondents Ouraring Inc. and Oura Health Oy (collectively, “Oura”) respectfully submit this pre-hearing statement in advance of the evidentiary hearing scheduled to begin September 16, 2026.

I. IDENTIFICATION OF WITNESSES

Pursuant to Ground Rule 11.1(a), Oura identifies the following known witnesses it expects to call at the hearing, whether they are fact or expert witnesses, together with a brief outline of each witness’s proposed testimony. Copies of the curriculum vitae for Oura’s expert witnesses are attached as **Exhibits 1–3**.

Oura reserves the right to call additional witnesses necessitated by any of the Administrative Law Judge’s pre-hearing or hearing rulings; additional witnesses to provide foundational testimony if any party contests the authenticity or admissibility of material proffered at the evidentiary hearing; substitute witnesses if one of Oura’s anticipated witnesses becomes unavailable; any witness identified by Complainants in their Pre-Hearing Statement; additional witnesses to respond to issues raised after the submission of this list; and/or additional rebuttal witnesses to respond to evidence or testimony presented at the evidentiary hearing by Complainants that could not reasonably have been anticipated as of the date of this list.

Further, Oura intends to rely on the designated deposition testimony of witnesses deposed in this matter (including those identified in Oura’s Pre-Hearing Brief) and who do not appear live at the hearing. Oura reserves the right to call any deposition witness live in the event that individual’s designated deposition testimony is not admitted into the record. Estimated dates and length of live testimony are discussed in Section V and **Exhibit 5**.

Name and Address	Fact/Expert	Outline of Testimony
Bobak Mortazavi Texas A&M University, Department of Computer Science & Engineering Texas A&M University 435 Nagle Street College Station, TX 77843-3112	Expert	Dr. Mortazavi will testify regarding technical matters in this investigation, including the technical background of the asserted patents, the state of the art at the time of the alleged inventions of the asserted patents, the level of ordinary skill in the art, invalidity of the asserted patents, and non-infringement.
Patrick Mercier University of California, San Diego 9500 Gilman Drive, 0407 La Jolla, CA 92093	Expert	Dr. Mercier will testify regarding technical matters in this investigation, including the technical background of the asserted patents, the technical prong of the domestic industry requirement, the level of ordinary skill in the art, and lack of nexus for secondary considerations.
John C. Jarosz Analysis Group, Inc. 800 17th Street, NW Suite 400 Washington, DC 20006	Expert	Mr. Jarosz will testify regarding how Samsung has failed to satisfy the economic prong of domestic industry. Mr. Jarosz will further testify regarding the appropriate remedy, CDO, and bond.
Miguel Christophy 500 Pine Street San Francisco, CA 94104	Fact	Background of Oura and the Oura Rings, design and operation of the Accused Oura Products and the Oura Ring Gen. 1, as it relates to hardware.
Michael Larson 500 Pine Street San Francisco, CA 94104	Fact	Background of Oura and the Oura Rings, design and operation of the Accused Oura Products and the Oura Ring Gen. 1, as it relates to firmware.
Christopher Martinez, Samsung Corporate Witness	Fact	Samsung's allegations relating to its alleged satisfaction of the economic prong of the domestic industry requirement.

II. **EXHIBITS**

Pursuant to Ground Rule 11.1(b), **Exhibit 4** is a copy of Oura's Preliminary Exhibit List, which includes exhibits that Oura may seek to introduce at the evidentiary hearing. This list includes Oura's documentary exhibits (RX) and Oura's physical exhibits (RPX).¹ Oura will

¹ The Parties are conferring on a schedule whereby demonstrative exhibits will be exchanged in the day(s) preceding proposed use at the evidentiary hearing.

continue to review its exhibit list in an attempt to reduce the number of exhibits prior to the evidentiary hearing. Oura may also identify additional exhibits, withdraw exhibits, and may use exhibits identified on the Joint Exhibit List and/or Complainants' exhibit list (CX, CPX, or CDX), newly produced information, and additional documents, including for cross-examination and impeachment. Oura, however, does not waive any objection to Complainants using exhibits on Oura's exhibit list or the Joint Exhibit List.

III. STIPULATIONS

Pursuant to Ground Rule 11.1(c), the parties have entered into the following stipulations:

- Joint Stipulation Regarding Importation and Inventory Between Complainants and Respondents (June 1, 2026) (EDIS Doc ID 883875) (JX-0074C)

IV. PROPOSED AGENDA FOR THE PREHEARING CONFERENCE

Pursuant to Ground Rule 11.1(d), Oura proposes the following agenda for the Pre-Hearing Conference, scheduled for September 16, 2026:

1. Resolution of any pending motions, including motions *in limine*, to the extent any remain pending.
2. Discussion of objections to proposed deposition designations, exhibits, and demonstratives.
3. Admission of stipulations, Joint Exhibits, and exhibits to which no party objects.
4. Address any scheduling issues, including confirming the allocation of time between the parties and the order and timing of witnesses.
5. Participation of NEXT Advocate attorneys in the evidentiary hearing.
6. Address any other issues related to the pre-hearing submissions.
7. Any other matters that the ALJ deems appropriate for discussion.

V. ESTIMATED DATE AND LENGTH FOR APPEARANCE OF EACH WITNESS

Pursuant to Ground Rule 11.1(e), **Exhibit 5** is a table reflecting the parties' exchanged witness examination estimates. Oura will inform the ALJ of any modifications to these estimates based on developments prior to and during the evidentiary hearing.

VI. CERTIFICATION REGARDING GOOD FAITH EFFORTS TO SETTLE

Pursuant to Ground Rule 11.1(f), Oura certifies that it has made good faith efforts to settle with each Complainants, but the parties have not reached a settlement. More specifically, Oura and Samsung participated in a mediation session on June 3, 2026. The mediation was conducted by independent mediator Judge David Folsom. Counsel of record as well as client representatives with full authority to negotiate a settlement and execute an agreement resolving the issues attended. Despite good-faith efforts, the parties were unable to reach an agreement. *See Joint Report on Mediation (July 1, 2026) (EDIS Doc. ID 886806).*

RESEARCH THEMES

- **Systems and Analytics for Personalized Digital Health:** Design of machine learning methods for clinical outcomes using multimodal modeling and clinician-in-the-loop time-varying, dynamic risk prediction.
- **Personalized Sensing and IoMT:** Design of analytics to connect Internet of Medical Things to clinical outcomes research for personal and remote sensing and digital health.
- **Translational Clinical Outcomes Research:** Implement techniques to enable clinical translation and facilitate clinical interventions, observational comparative effectiveness, and improve outcomes.

HIGHLIGHTS

- **Research:** Establishing research that serves as an integral bridge for interdisciplinary teams in creating novel sensing, developing advanced analytics, and facilitating clinical translation.
Google Scholar H-Index: 35.
 - Produced first analytic models to automate diet monitoring from continuous glucose monitors.
 - Designed advanced analytics for novel wearable sensors to create cuffless blood pressure monitors.
 - Developed multimodal machine learning techniques for dynamic, adaptable clinical outcomes research.
- **Teaching:** Design of machine learning classes to promote digital health. Teaching machine learning and capstone courses with a focus on translation.
- **Advising:** Graduated our department's first MD PhD graduate, graduated 5 PhD students.
- **Service:** Integrating objectives and connecting communities through service.
 - Serving cross-cutting disciplines in engineering (Associate editor, IEEE Journal of Biomedical and Health Informatics, IEEE Transactions on Biomedical Engineering, ACM Transactions on Computing for Healthcare), and health sciences (Associate editor, Journal of the American College of Cardiology). (**IEEE JBHI, IEEE TBME, ACM HEALTH, and JACC**).
 - Served in conference organization leadership for several flagship conferences including IEEE Engineering in Medicine and Biology Society Conference (EMBC: Theme Editor), IEEE-EMBS Body Sensor Networks (BSN: General Chair '25), IEEE-EMBS Biomedical and Health Informatics (BHI: TPC Co-Chair '24, General Co-Chair '25), and AHLI Conference on Health Inference and Learning (CHIL: Senior Area Chair '24, Proceedings Chair '23).

Professional Highlights

- Currently leading a ~20-person group undertaking high-impact research spanning multiple domains, from near-zero-power integrated circuits, power management, energy harvesting, neural interfaces, wearable physiochemical sensors, RFICs and RF systems, and beyond
- Over 220 peer-reviewed publications, including 32 *ISSCC* papers, 37 *JSSC* papers, and several papers in high-impact journals such as *Science*, *Nature Biotechnology*, *Nature Biomedical Engineering*, *Nature Electronics*, *Nature Communications*, *Advanced Science*, *Energy and Environmental Science*, and more
- Recognized as one of the top contributors of all time at the 2023 *IEEE International Solid-State Circuits Conference (ISSCC)*
- Co-founder and co-director of the successfully industry-supported UCSD Center for Wearable Sensors
- Site Director of the successfully industry/NSF-supported IUCRC Power Management Integration Center, partnered with Dartmouth College
- Multiple young investigator awards: DARPA YFA, NSF CAREER, Beckman YIA
- ISSCC Jack Kilby Award for Outstanding Student Paper
- Over \$40MM in research fundraising to date
- UCSD-wide Academic Senate Teaching Award, and two ECE department teaching awards
- IEEE Fellow
- ISSCC Executive Committee member; former ISSCC, VLSI, and CICC TPC member
- Startup co-founder (Traq), board member (QuantalRF), and scientific advisory board member (Nanovision and NeuroVigil)
- 28 issued US patents

Education

Ph.D. **Massachusetts Institute of Technology**, Electrical Engineering, June 2012

Thesis title: *Communication and Power Delivery Architectures for Personal Medical Devices* (GPA: 5.0/5.0)

Advisor: Anantha P. Chandrakasan

- S.M. **Massachusetts Institute of Technology**, Electrical Engineering, June 2008
Thesis title: *An All-Digital Transmitter for Pulsed Ultra-Wideband Communication* (GPA: 5.0/5.0)
Advisor: Anantha P. Chandrakasan
- B.Sc. **University of Alberta**, Electrical and Computer Engineering, May 2006
GPA: 4.0/4.0

Selected Honors and Awards

- **IEEE Fellow** – awarded to less than 0.1% of voting members in the IEEE Solid-State Circuits Society – Class of 2025
- **Teacher of the Year Award** – Jacobs School of Engineering at UC San Diego Annual Best Teacher Award Selected by Ballot of the Students – 2023

- **IEEE International Solid-State Circuits Conference (ISSCC) Author-Recognition Award** – Awarded to authors who have contributed more than 20 papers to ISSCC – 2023
- **San Diego County Engineering Council Outstanding Engineer Award** – Awarded annually to a single local engineer who has made significant technical contributions to their society – 2020
- **National Academy of Engineering Frontiers of Engineering Speaker** – A competitive invitation-only event for those who have demonstrated accomplishment in engineering research and technical work with recognizable contributions to advancing the frontiers of engineering – 2019
- **IEEE Solid-State Circuits Society Distinguished Lecturer** – Nominated to deliver invited lectures at local chapters and regional meetings across the world for a two-year term – 2019
- **NSF CAREER Award** – The National Science Foundation’s most prestigious awards in support of early-career faculty – 2018
- **Biocom Catalyst Award** – Awarded to ten academics, entrepreneurs, investors, corporate leaders, and business advisers under 40 years old who are igniting innovation and growth in the San Diego and Los Angeles life sciences industry – 2017
- **IEEE Senior Member** – Elected for showing significant performance over a 10+ year career – 2017
- **Moore Inventor Fellow Finalist** – Selected as a top-10 fellow amongst >200 other applicants at top US universities; received \$25k award – 2017
- **UCSD Academic Senate Distinguished Teaching Award** – Awarded yearly to five distinguished teachers across all departments at UCSD (totaling ~2200 senate members – i.e., the top 0.2% of teachers). First winner in the ECE department since Jack Wolf in 1999. Received 2016
- **DARPA Young Faculty Award** – Awarded to young faculty members who propose high-impact, high-risk research programs – 2015
- **Beckman Young Investigator Award** – Awarded to eight junior faculty members across the US for innovating research within the chemical and biological sciences – 2015
- **Hellman Fellowship Award** – Awarded to junior faculty members who show capacity for great distinction in their research and creative activities – 2014
- **Graduate Teaching Award** – Awarded annually to one (of ~50) faculty in the UCSD ECE department for outstanding teaching and service – 2013
- **Jack Kilby Award** – One awarded per year for outstanding student paper at the *International Solid-State Circuits Conference (ISSCC)* – received 2010
- **Intel Foundation Ph.D. Fellowship** – awarded to 26 applicants across the US – 2009
- **Post Graduate Scholarship** – Natural Sciences and Engineering Council of Canada (NSERC) – 2007, 2009
- **Best Presentation Award**, Microsystems Technology Lab Annual Research Conference – 2008, 2010
- **Julie Payette Postgraduate Research Fellowship** – Awarded to the top 24 Master’s NSERC applicants in Canada – 2006
- **APEGGA Medal** – Highest undergraduate GPA in Electrical Engineering – 2006
- **Atco Electric Centennial Award** – March 2005
- **Schlumberger Scholarship** in Electrical Engineering – 2004, 2005

Other Awards and Recognitions

- **IEEE Custom Integrated Circuits Conference (CICC) 2025** – Best Paper Award Finalist
- **IEEE International Solid-State Circuits Conference (ISSCC) Student Research Preview Poster Award** – 2024
- **IEEE Solid-State Circuits Society (SSCS) Outstanding Reviewer Reward** – 2024.
- **IEEE ISCAS Women in Circuits and Systems (WiCAS)** – Runner Up Paper Award – 2023.
- **IEEE International Symposium on Circuits and Systems (ISCAS)** – Best Runner Up Paper – 2023.
- **Qualcomm Innovation Fellowship (QIF) 2023** – Winner
- **IEEE Applied Power Electronics Conference (APEC)** – Outstanding Presentation Award 2023 – “A Series/Parallel Magnetic-Less Step-Down Converter Based on Piezoelectric Resonators”
- **IEEE Brain Technical Community and IEEE Solid-State Circuits Society** – Brain-Related Best Paper Award 2021 – “An Optically-Addressed Nanowire-Based Retinal Prosthesis with 73% RF-to-Stimulation Power Efficiency and 20nC-to-3[^]C Wireless Charge Telemetry” presented at ISSCC 2021.
- **IEEE Symposium on Very Large Scale Integration (VLSI Symposium) 2020** – Best Student Paper Award Nominee – “A -105dB THD 87dB-SNDR VCO-based Sensor Front-end Enabled by Background-Calibrated Differential Pulse Code Modulation”
- **IEEE Symposium on Very Large Scale Integration (VLSI Symposium) 2020** – Best Student Paper Award Nominee – “A 4.4 μ W -92/-90.3dBm Sensitivity Dual-mode BLE/Wi-Fi Wake-up Receiver”
- **Qualcomm Innovation Fellowship (QIF) 2020** – Winner
- **IEEE EMBS Workshop on Brain, Mind and Body – Cognitive Neuroengineering for Health and Wellness 2019** – Third place poster award
- **IEEE Custom Integrated Circuits Conference (CICC) 2019** – Outstanding Student Paper Award Nominee
- **IEEE Custom Integrated Circuits Conference (CICC) 2018** – Outstanding Student Paper Award Nominee
- **IEEE Custom Integrated Circuits Conference (CICC) 2015** – Outstanding Student Paper Award Nominee
- **Qualcomm Innovation Fellowship (QIF) 2014** – Finalist

Funding

Energy-Efficient Microsystems Lab

As PI of the Energy-Efficient Microsystems Lab, I have raised over \$40MM for research at UCSD from the following sources:

- DARPA
- NIH
- NSF
- The Arnold and Mabel Beckman Foundation
- Semiconductor Research Corporation
- ONR
- iARPA
- Army Research Lab
- KETI
- NextFlex
- The Fetzer Franklin Fund
- The Hellman Foundation
- Samsung
- Qualcomm
- Dockon Inc.
- Mouthsense Inc.
- Peregrine Semiconductor
- IMA Life North America
- Moore Foundation
- University of California Multi-Campus Research Programs and Initiatives
- California Energy Commission
- The UCSD Center for Brain Activity Mapping
- The UCSD Center for Wireless Communications (corporate sponsored)
- The UCSD Center for Wearable Sensors (corporate sponsored)
- The Power Management Integration Center (corporate sponsored)

UC San Diego Center for Wearable Sensors

As co-director of the Center for Wearable Sensors, I have been instrumental in fundraising over \$7MM from corporate partners, with the bulk of this funding used to support collaborative

efforts across six engineering departments, the School of Medicine, and the Department of Visual Arts.

Power Management Integration Center

As Site Director of the Power Management Integration Center, I have help recruit corporate members to support research at both UCSD and at Dartmouth College.

- Undergraduate/Graduate Affairs and Student Award Nomination committee (2012-2014)
- Medical Devices and Systems curriculum director (2013-2014)
- Medical Devices and Systems Ad-hoc committee - responsible for creating a new program in this area (2012-2013)

Co-Chair, Microsystem Technology Lab Annual Research Conference (2011)

Annual research conference with over 200 academic and industrial attendees. Responsible for steering committee leadership and conference organization including: solicitation of papers, managing paper edits, keynote speaker invitation, opening and closing remarks, and general planning. Created interactive attendee activities to solicit social and technical engagement amongst industry members and students. Cited by a high-ranking industry member as “the best student run conference in the country”.

Broader Impacts & Outreach

- Presented a webinar at BioXTech, a country-wide club founded and run by high school women interested in the intersection of biology and technology, and answered questions about technology and gave career advice (2023)
- Featured in the publication entitled “Building Blocks for Better Science: Case Studies in Low-Cost and Open Tools for Science”, which describes my work in low-cost COVID-19 symptoms monitoring devices (2020)
- Guest instructor at Hands-on-Technology summer camp at Wangenheim Middle School focused on accelerating the understanding of computer science in elementary and school-aged children (2014-present)
- Directly mentored ten B.S., M.S., and Ph.D. students from historically underrepresented backgrounds, including two high school students (2012-present)
- Directly mentored two high school students from historically underrepresented backgrounds (2013, and 2016-2017)
- Keynote speaker at ENSPIRE: one of the largest outreach at UCSD, where over 300 middle-school children visit UCSD to learn about higher education and engineering (Feb. 2015)
