Aerospace, Defense and Critical Infrastructure

Secure, Trusted and Resilient Supply

As a global leader in secure semiconductor manufacturing, GlobalFoundries (GF) offers advanced, differentiated technologies for the aerospace, defense and critical

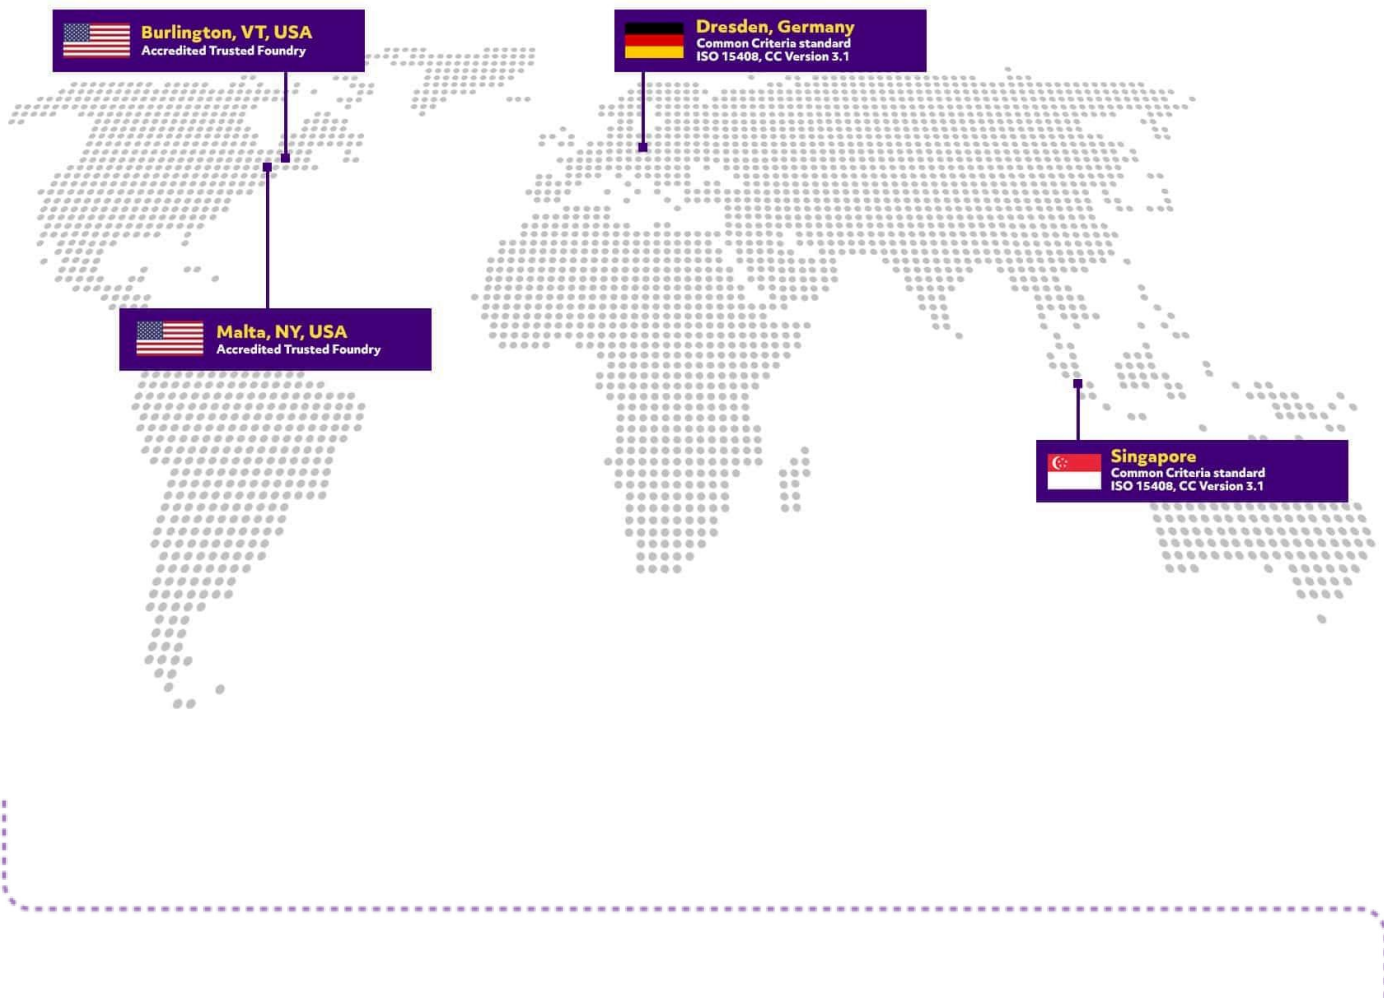

supply you can rely on

**The technology platforms you need, where
you need them**

Europe and Asia, GF provides solutions worldwide, while meeting customer requirements for secure regional supply chains. As an accredited Trusted Foundry and Common Criteria certified supplier, GF employs the most stringent processes, equipment and oversight necessary to manufacture chips with the highest levels of security, ensuring secure and uncompromised delivery for critical end applications.

Trusted and secure

GF plays a pivotal role in global security by manufacturing secure semiconductors that enhance the reliability and effectiveness of microelectronics, and mitigate the risks associated with counterfeit or untrusted microchips. With a proven track record spanning more than two decades, we maintain stringent processes, equipment, and oversight to ensure the secure production of sensitive chips. GF is an Accredited Supplier of the Trusted Foundry Program in the U.S., and our manufacturing facilities in Europe and Asia regions hold Common Criteria accreditation. The U.S. Trusted Foundry Program is the strongest assurance to produce uncompromised chips for aerospace and defense systems, while the Common Criteria certification is an internationally recognized standard for the production of goods that require an extra level of security and integrity

Strengthening U.S. manufacturing for mission-critical defense systems

GlobalFoundries is committed to supporting U.S. aerospace and defense programs through secure, on-shore semiconductor manufacturing at our ITAR-compliant, Trusted facility in Malta, New York and Burlington, Vermont. As a long-standing domestic supplier to the U.S. aerospace and defense ecosystem, both sites provide the security, assured access and resilient supply chain required to support the nation's most demanding mission profiles.

Our New York 300mm manufacturing facility continues to expand U.S. production with advanced platforms including 22FDX® and high-volume 12LP, ensuring performance, energy efficiency and long-term availability for defense applications ranging from secure communications to sensing and computing at the edge.

Our Burlington, Vermont 200mm manufacturing facility is a critical hub for GF's U.S. power and RF capabilities, specializing in GaN (Gallium Nitride) and high-voltage GaN-on-silicon processes. These technologies enable next-generation power electronics, radar, satellite systems, autonomous platforms and other high-performance A&D applications requiring superior power density and efficiency.

Together, our New York and Vermont fabs provide a geographically diverse, secure U.S. manufacturing footprint that enhances national-security readiness and reduces reliance on foreign supply chains.

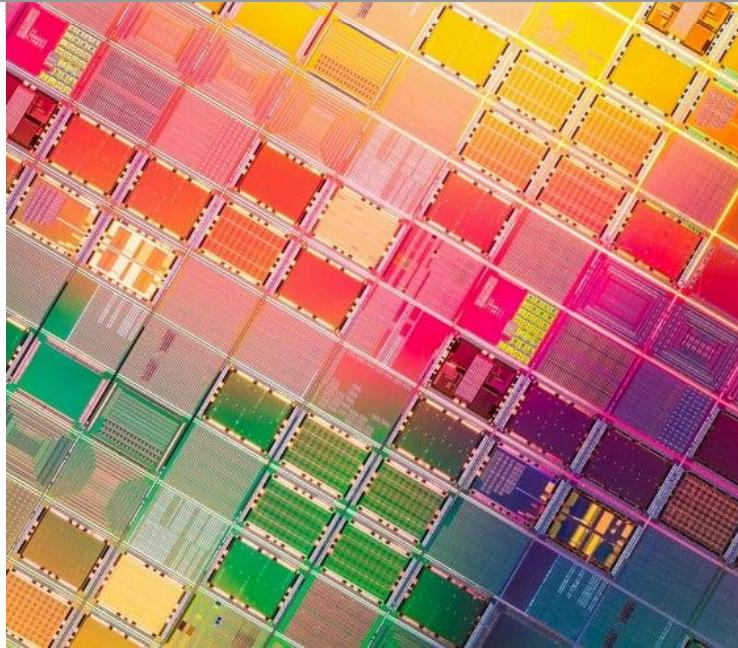

Explore GF's U.S. manufacturing leadership

- GF & Navitas Semiconductor Partner to Accelerate U.S. GaN Technology and Manufacturing
- GF & Silicon Labs: Strengthening U.S. chip manufacturing
- GF & Apple: Advancing wireless connectivity and U.S. production
- GF's \$16B U.S. Onshoring Investment

Differentiated solutions

GF's differentiated chip solutions provide optimized performance and reliability for aerospace, defense and critical infrastructure applications. GF drives innovation and enhances the security of chips used in crucial systems, including power grids and wireless communications to banking, hospitals and national security systems and satellites.

Contact Us

GlobalFoundries (GF) is a leading manufacturer of essential semiconductors the world relies on to live, work and connect. We innovate and partner with customers to deliver more power-efficient, high-performance products for high-growth markets. With our global manufacturing footprint spanning the U.S., Europe and Asia, we are a trusted and reliable source for customers around the world.

At GF, we shape what's essential.
