DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 4, and 7-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Negoro et al (US Pat 6,979,864).

Regarding claim 1, Negoro teaches a device comprising:

s substrate (1, Fig. 1) prepared with an active device region, wherein the active device region includes a gate (11g, Fig. 1);

a doped channel well (23, col. 15, lines 8-37, Fig. 1) disposed in the substrate adjacent to a first edge of the gate, the first edge of the gate overlaps the channel well with a channel edge of the channel well beneath the gate, the first edge of the gate and channel edge defines an effective channel length of the device, wherein the effective channel length is self-aligned to the gate; and

a doped drift well (24, col. 15, lines 38-59, Fig. 1) adjacent to a second edge of the gate.

Regarding claim 4, Negoro teaches wherein the first edge of the gate (11g) corresponds to a channel edge of the gate of the device and a second edge of the gate corresponds to a drain edge of the gate of the device (drain 11d, col. 15, lines 8-59, Fig. 1).

Art Unit: 2892

Regarding claims 7-12, Negoro teaches the channel length (col. 15, lines 19-21, and Fig. 1).

The limitation must distinguish from the prior art in terms of structure rather than function, *In re Schreiber*, 128 F.3d 1473, 1477-78, 44 USPQ2d 1429, 1431-32 (Fed. Cir. 1997); See also *In re Swinehart*, 439 F.2d 210, 212-13, 169 USPQ 226, 228-29 (CCPA 1971). Claims directed to apparatus must be distinguished from the prior art in terms of structure rather than function. *In re Danly*, 263 F. 2d 844, 847, 120 USPQ 528, 531 (CCPA 1959). "Apparatus claims cover what a device is, not what a device does." *Hewlett-Packard Co. v. Bausch & Lomb Inc.*, 909 F. 2d 1464, 1469, 15 USPQ2d 1525, 1528 (Fed. Cir. 1990).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Negoro et al (US Pat 6,979,864) in view of Matocha et al (US Pat 7,829,402).

Negoro teaches the channel length (col. 15, lines 19-21, and Fig. 1), but does not teach wherein the effective channel length is less than about 0.4 μm .

Matocha teaches wherein the effective channel length is less than about 0.4 μm (col. 4, lines 40-55, and Fig. 2). Since Matocha and Negoro are all from the same field

Art Unit: 2892

of endeavor, the purpose disclosed by Matocha would have been recognized in the pertinent art of Negoro. It would have been obvious to a person of ordinary skill in the art at the time of the invention was made to form the effective channel length in order to enable the device with better performance and greater reliability as taught by Matocha , col. 1, lines 20-23.

5. Claims 3, 5, 6, 13, and 15-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Negoro et al (US Pat 6,979,864) in view of Chang (US Pat 7,935,992).

Regarding claims 3, 5, 6, 13, 15-17, and 20, Negoro teaches a device comprising:

s substrate (1, Fig. 1) prepared with an active device region, wherein the active device region includes a gate (11g, Fig. 1);

a doped channel well (23, col. 15, lines 8-37, Fig. 1) disposed in the substrate adjacent to a first edge of the gate, the first edge of the gate overlaps the channel well with a channel edge of the channel well beneath the gate, the first edge of the gate and channel edge defines an effective channel length of the device, wherein the effective channel length is self-aligned to the gate;

a doped drift well (24, col. 15, lines 38-59, Fig. 1) adjacent to a second edge of the gate; a doped deep well (21, col. 14, lines 59-60) in the substrate of the active device region encompassing the doped drift well; and first and second diffusion regions (11s 11d, Fig. 1) adjacent to the gate.

Negoro teaches the doped drift well (24, col. 15, lines 38-59, Fig. 1), but does not teach a drift isolation region in the doped drift well.

Chang teaches a drift isolation region (15) in the doped drift well (7L) (col. 3, lines 44-67, and Fig. 2A). Since Chang and Negoro are all from the same field of endeavor, the purpose disclosed by Chang would have been recognized in the pertinent art of Negoro. It would have been obvious to a person of ordinary skill in the art at the time of the invention was made to form the drift isolation region in order to define the device active region as taught by Chang, col. 1, lines 45-55.

Regarding claims 18 and 19, Negoro teaches the channel length (col. 15, lines 19-21, and Fig. 1).

The limitation must distinguish from the prior art in terms of structure rather than function, *In re Schreiber*, 128 F.3d 1473, 1477-78, 44 USPQ2d 1429, 1431-32 (Fed. Cir. 1997); See also *In re Swinehart*, 439 F.2d 210, 212-13, 169 USPQ 226, 228-29 (CCPA 1971). Claims directed to apparatus must be distinguished from the prior art in terms of structure rather than function. *In re Danly*, 263 F. 2d 844, 847, 120 USPQ 528, 531 (CCPA 1959). "Apparatus claims cover what a device is, not what a device does." *Hewlett-Packard Co. v. Bausch & Lomb Inc.*, 909 F. 2d 1464, 1469, 15 USPQ2d 1525, 1528 (Fed. Cir. 1990).
