

PUBLIC VERSION

Exhibit 24C

REDACTED

UNITED STATES INTERNATIONAL TRADE COMMISSION
WASHINGTON, D.C.

In the Matter of

**Certain Powered Rocker-Recliner and
Glider-Recliner Mechanisms and Seating
Units Containing Same**

Investigation No. 337-TA-_____

**DECLARATION OF SHANE HOFFMAN IN SUPPORT OF THE COMPLAINT
OF ULTRA-MEK INC. AND LEGGETT AND PLATT INC. UNDER SECTION 337 OF
THE TARIFF ACT OF 1930, AS AMENDED**

1. I, Shane Hoffman, have personal knowledge of the facts set forth in this declaration or they are based upon information provided to me in the ordinary course of my business, and I believe all the facts stated below to be true. If called as a witness, I could competently testify to these facts. I hereby declare that:
2. I am the President of Ultra-Mek, Inc. ("Ultra-Mek"). I have held this position since 2013 and have worked at Ultra-Mek since 1994. In my role as President, I am familiar with Ultra-Mek's business, financial records, accounting systems, and information concerning Ultra-Mek's sales, costs, labor, materials, overhead, and other expenditures relating to the products discussed in this Declaration.
3. Ultra-Mek is a moderately sized privately held corporation located at 487 Bombay Road, Denton, North Carolina 27239. It was founded in 1983 and has operated continuously in North Carolina for the last 43 years. Since its founding, it has continued to expand its manufacturing facilities at the Denton location and currently employs more than 160 people in North Carolina. It also maintains a showroom in High Point, North Carolina. Ultra-Mek is a family-owned business, managed by myself and my father, Steven Hoffman, who is the co-founder and chief executive officer. Ultra-Mek is an entirely American corporation, with no facilities outside of the United States.
4. I understand that Ultra-Mek is the owner of two patents being asserted in this Investigation—U.S. Patent Nos. 8,016,348 (the "'348 Patent") and 8,297,693 (the "'693 Patent") (collectively, the "Ultra-Mek Asserted Patents"). I further understand that Ultra-Mek has granted Leggett and Platt Incorporated ("L&P") a license to the '348 Patent and the '693 Patent.
5. I have been asked to describe Ultra-Mek's investments and activities in the United States relating to certain mechanisms and finished products, including Ultra-Mek's 7800 and

7900 rocker and glider mechanisms (the “Ultra-Mek Domestic Industry Products”). The activities and investments Ultra-Mek performs and makes in the United States for the Ultra-Mek Domestic Industry Products include manufacturing, labor, plant and equipment, research, development, engineering, prototype work, customer service, technical support, materials purchases, sales, marketing, showroom activities, and trade-show activities. Over [REDACTED] Ultra-Mek’s employees work on the Ultra-Mek Domestic Industry Products.

6. Prior to 2008, there were no commercially available powered glider-recliners or powered rocker-recliners as recited in the patent claims in the market. Ultra-Mek and others in the industry recognized a growing demand in the marketplace for a powered, reciprocating recliner that would permit all users to position and adjust the seating unit without having to use physical force and have the advantages reflected in the patent claims. [REDACTED]

7. Mr. Steve Hoffman and Mr. Marcus Murphy of Ultra-Mek spent considerable time and effort to develop Ultra-Mek’s powered rocker glider mechanism, and filed for patent protection in 2008. Ultra-Mek’s technology allowed customers to position their seating units without expending great physical force and became the de-facto industry standard for powered rocker-recliner and glider-recliner mechanisms. Ultra-Mek granted an exclusive license to L&P [REDACTED]

8. Ultra-Mek designs, manufactures, and sells the mechanisms used in the Domestic Industry Products 100% in the United States. Ultra-Mek’s U.S. manufacturing activities related to the Ultra-Mek Domestic Industry Products include materials planning, fabrication, labor, overhead, and assembly. This includes the manufacture of many of the components of the products. All of these activities take place entirely in the United States. Approximately [REDACTED] manufacturing the Ultra-Mek Domestic Industry Products at Ultra-Mek’s facilities in Denton, North Carolina. In addition, many materials and components for Ultra-Mek’s mechanisms are sourced from the United States, including springs, rivets, casings, bushings, washers, and steel.

9. Ultra-Mek’s Domestic Industry Products are proudly American-made and allow customers who prefer a domestically manufactured product to purchase and enjoy the benefits of powered rocker-gliders. As explained above, nearly all components of the domestic industry products—including the frames, mechanisms, upholstery, and assembly labor—originate from Ultra-Mek’s own U.S. facilities or from other domestic suppliers. By offering a high-quality, American-made powered recliners, Ultra-Mek fills a meaningful niche for U.S. consumers—including those who prioritize domestic manufacturing and

support of the American workforce—that would otherwise go unserved by the imported powered-recliner market.

10. Ultra-Mek invested the following amounts in direct labor and U.S.-sourced material costs for the Ultra-Mek Domestic Industry Products: approximately [REDACTED] in 2023. As of May 15, 2026, the direct labor and U.S.-sourced material costs for Ultra-Mek Domestic Industry Products in 2026 were approximately [REDACTED]
11. Ultra-Mek incurs overhead costs in the United States in connection with manufacturing the Ultra-Mek Domestic Industry Products, which includes items such as indirect labor, supervisors, forklift drivers, line leaders, benefits, factory supplies, machine and equipment repairs, utilities, and insurance. The manufacturing overhead costs for the Ultra-Mek Domestic Industry Products were approximately [REDACTED] in 2023. As of May 15, 2026, the portion of 2026 overhead allocable to the Ultra-Mek Domestic Industry products was [REDACTED]
12. Ultra-Mek incurs selling, general, and administrative (“SG&A”) costs associated with selling and supporting the Ultra-Mek Domestic Industry Products. Ultra-Mek’s SG&A costs include costs associated with sales personnel, utilities, office supplies, building repairs, property tax, depreciation, executive salaries, administrative support, and payroll expenses. The SG&A costs for the Ultra-Mek Domestic Industry Products were approximately [REDACTED] in 2023. As of May 15, 2026, the portion of the SG&A costs allocable to the Ultra-Mek Domestic Industry products was [REDACTED].
13. The amount invested by Ultra-Mek in the United States to produce the Ultra-Mek Domestic Industry Products [REDACTED]
14. Ultra-Mek’s activities with respect to the Ultra-Mek Domestic Industry Products are not limited to those described above. For example, Ultra-Mek employs a number of individuals performing research and development work on the Ultra-Mek Domestic Industry Products and provides customer service and technical support in the United States for its mechanisms, including the Ultra-Mek Domestic Industry Products. Ultra-Mek also markets and promotes the Ultra-Mek Domestic Industry Products in the United States in various ways including participation in trade shows, furniture markets, and maintaining a 12,000 square foot showroom in High Point, NC where customers may come see the Ultra-Mek Domestic Industry Products and other Ultra-Mek products.

15. The table below summarizes some of the allocated investment data above:

	2023	2024	2025	2026 (As of 5/15)
Manufacturing Material & Labor				
Overhead				
SG&A				
Cost Percentage vs. Revenue				

I further reserve the right to supplement this declaration if warranted to include additional investments made previously or in the future.

I declare under penalty of perjury that the foregoing is true and correct.

Executed on August 20, 2026

/s/ Shane Hoffman
