

EXHIBIT 25

(Public Version)

Ex. 25C - Domestic Industry Claim Chart
U.S. Patent No. 12,530,925 (“the ’925 patent”)

trinamiX GmbH (“trinamiX”) hereby identifies evidence demonstrating the following trinamiX products practice the ’925 Patent: all trinamiX products that include trinamiX Face Authentication, including but not limited to e.g., the trinamiX Face Authentication software libraries and SDK, ET-90 demonstrator, Cockatiel demonstrator, and MPIC2.0 (collectively, the “Practicing ’925 Products”). These products are made by trinamiX, and are imported, sold for importation, and/or sold within the United States after importation by trinamiX. The chart below is based on evidence of representative products of the Practicing ’925 Products. Each of the following limitations is met literally, and, to the extent a limitation is not met literally, it is met under the doctrine of equivalents.

The trinamiX products identified in this chart are representative of all relevant trinamiX products containing relevant components practicing the patent. The same or similar analysis as discussed below apply to all relevant trinamiX products containing relevant components practicing the patent because, for example, the cameras, sensors, and software operate similarly within each device, and each corresponding device has the same or similar components, features, functions, and/or characteristics. This will further be confirmed through expert discovery.

Claim 1	Practicing ’925 Products
[1pre] A system comprising:	To the extent the preamble is limiting, the Practicing ’925 Products comprise a system. For example, each of the Practicing ’925 Products is a system that performs face authentication:

[1a] a near infrared (NIR) camera configured to capture a scene, the NIR camera comprising a CMOS sensor;	The Practicing '925 Products comprise a near infrared (NIR) camera configured to capture a scene, the NIR camera comprising a CMOS sensor. The Practicing '925 Products comprise a near infrared camera with a NIR camera and CMOS sensor that captures images:

[1b] an illumination unit comprising at least one of an LED and a laser, the illumination unit configured to project NIR light in a light pattern toward the scene;	The Practicing '925 Products comprise an illumination unit comprising at least one of an LED and a laser, the illumination unit configured to project NIR light in a light pattern toward the scene. The Practicing '925 Products comprise an illumination unit, such as a dot projector and flood illuminator, which projects illumination patterns for skin detection:
