2022:	\$399,079
2021:	\$359,364

Products: Modular power components and power systems for converting electrical power.

Customers: The applications in which our products are used are typically in the higher-performance, higher-power segments of the market segments we serve. Our products are sold worldwide to customers ranging from small to large global original equipment manufacturers (OEMs), their contract manufacturers (CM's) and internationally to distributors who support their supply chains. Our Advanced Products serve customers concentrated in the High Performance Computing, Aerospace and Defense, Industrial and Automotive markets. Applications range from powering advanced processors in server motherboards and artificial intelligence accelerator cards and systems, server rack power conversion, radar systems, industrial automation, instrumentation, test equipment, solid state lighting, telecommunications and networking infrastructure, and mild hybrid and pure electric vehicle (EV) automobiles. Our Brick Products serve customers in aerospace and defense electronics, industrial automation, industrial equipment, instrumentation and test equipment, and transportation (notably in rail and heavy equipment applications).

Customer support:	Vicor serves its customers through several sales channels: a direct sales force; a network of independent sales representative organizations in North America; independent, authorized distributors in Asia; and four globally franchised authorized stocking distributors. Field Applications Engineers, who are located in all of our global offices, provide direct technical sales support for Vicor power modules, reviewing power system applications and specifications plus technical matters with our channel partners in support of existing and potential customers. Vicor's Customer Service staff works to ensure that each customer and sales channel partner receives a rapid and professional response for each business transaction.
-------------------	--

Manufacturing:	Power components are manufactured using highly automated processes in Vicor's ISO 9001:2015 and IATF 16949:2016 registered facilities in Andover, MA
